# Course specification of Sterile Products and Controlled Drug Delivery Systems

---

University: Zagazig Faculty: Pharmacy

## A- Course specifications:

Program (s) on which the course is given: Bachelor of Pharmacy

Major or Minor element of programs: Major

Department offering the program: -----

Department offering the course: Pharmaceutics Department

Academic year Level: Third year/Second semester

Date of specification approval: 3 January 2019

## B- Basic information:

Title: Sterile Products and Controlled Drug Delivery Systems Code: PC325

Credit Hours: ---

Lectures: 2hrs/week

Practical: 2hrs/week

Tutorials: ---

Total: 3hrs/week

## C- Professional information:

### 1-Overall aim of the course

On completion of the course, the student will be able to illustrate Parenteral preparations (advantages, disadvantages, route of administration, incompatibilities, manufacturing processes of "ampoules-vials", sterilization, packaging, quality control), Ophthalmic preparations (solutions, suspensions, powders for reconstitution, ointment, ocusert, contact lenses, packaging, use), Pharmaceutical aerosols (advantages, components, preparation, aerosols, filling, packaging), Controlled release dosage forms for oral use (rational for extended release, controlled drug delivery systems: "coated beads, microencapsulation, complex formation, resinated drugs"), Colloidal drug delivery systems (liposomes, niosomes, nanoparticles).

## 2- Intended learning outcomes of Sterile Products and Controlled Drug Delivery Systems (ILOs)

<b>A- Knowledge and Understanding</b>	
a1	Describe formulation requirements and quality control tests of aerosols.
a2	illustrate the principles and properties of different controlled drug delivery systems as well as colloidal drug delivery systems
a3	Outline the requirements, formulation and quality control tests of parenterals and ophthalmic dosage forms
a4	Illustrate the basis of sterilization and packaging of parenterals and ophthalmic dosage forms
<b>B- Professional and Practical skills</b>	
b1	perform different calculations related to compounding of parenterals including isotonicity adjustment, milliequivalent, osmolarity and rate of flow of intravenous infusions
<b>C- Intellectual skills</b>	
c1	Select the appropriate drug delivery system according to drug properties and the intended site and rate of drug release
c2	Interpret results of quality control tests of parenterals and aerosols according to the pharmacopeial requirements
<b>D- General and Transferable skills</b>	
d1	Use information technology to collect and present data
d2	Develop critical thinking, decision-making and problem-solving skills.
d3	Work effectively as a member of a team

## D- Contents:

Week No.	Lecture contents (2 hrs/week)	Practical session (2 hrs/week)
1	Pharmaceutical aerosols: - Advantages - components	Isotonic solutions
2	- Quality control of aerosols. - Filling of aerosols.	Problem solving
3	- Introduction to parenteral preparations - Advantages & disadvantages of parenterals - Requirements for parenteral preparations - Routes of parenteral administration - Classification of parenteral preparations	Electrolyte solutions: Milliequivalents, Milimoles and Milliosmoles
4	- Sterilization techniques moist heat , dry heat, radiation, gas and filtration	Problem solving
5	Formulation of parenterals	Intravenous Infusions, Parenteral Admixtures, and Rate-of-Flow Calculations
6	- Packaging of parenterals. - Quality control tests of parenteral preparations	Case study
7	Midterm exam	
8	Ophthalmic dosage forms	Parenteral admixtures
9	- Introduction to drug delivery systems - Advantages & disadvantages of delayed release dosage forms - Enteric coating - Colon specific drug delivery	Parenteral Nutrition

<b>10</b>	- Gastroretentive drug delivery systems - Diffusion based sustained release dosage forms - Bioerodible sustained release dosage forms - Osmotic pressure activated controlled drug delivery - Targeted release dosage forms	Case study
<b>11</b>	Colloidal drug delivery systems Liposomes	Revision evidence-based assignment
<b>12</b>	Colloidal drug delivery systems - Niosomes	<b>Delivery of assignment report</b>
<b>13</b>	Colloidal drug delivery systems - Microemulsion	<b>Practical exam</b>
<b>14</b>	- Revision&Open Discussion	
<b>15</b>	Final written exam	

### **E- Teaching and Learning Methods:**

- Lectures
- Practical session (problem solving)
- Self learning (evidence based assignments about sterile marketed products containing different controlled delivery systems, case study)

### **F- Student Assessment methods:**

- 1- Written exams to assess: a1, a2, a3, a4, c1
- 2- Activity to assess: d1, d2, d3
- 3- Practical exams to assess: a3, b1 , c2, d1, d2, d3
- 4- Oral exam to assess: a1, a2, a3, a4, c1

### **Assessment schedule**

<b>Assessment (1):</b> midterm exam	Week 7
<b>Assessment (2):</b> final Written exam	Week 15
<b>Assessment (3):</b> Assignment report	Week 12
<b>Assessment (4):</b> Practical exam	Week 13
<b>Assessment (5):</b> Oral exams	Week 15

### **Weighting of Assessment**

<b>Assessment method</b>	<b>Marks</b>	<b>Percentage</b>
<b>Midterm exam</b>	10	10%
<b>Written exam</b>	50	50%
<b>Practical exam</b>	20	20%
<b>activity</b>	5	5%
<b>Oral exam</b>	15	15%
<b>TOTAL</b>	100	100%

### **G- Facilities required for teaching and learning:**

Black ( white ) boards, data show

### **H- List of References:**

**1- Course Notes:** Student book of Sterile Products and Controlled Drug Delivery Systems approved by pharmaceuticals department (2019).

#### **2- Essential Books:**

# Course Specification of Phytochemistry I

---

University: **Zagazig** Faculty: **Pharmacy**

## A- Course specifications:

Program(s) on which the course is given: Bachelor of Pharmacy

Major or Minor element of programs: Major

Department offering the program: -----

Department offering the course: Pharmacognosy

Academic year/Level: Third year / semester 2

Date of specification approval: /09/2018

## B- Basic information:

Title: Phytochemistry I Code: PG324

Credit Hours: ---

Lectures: 2 hrs

Practical: 2 hr

Tutorials: ---

Total: 3 hrs

## C- Professional information:

### 1-Overall Aims of the Course:

On completion of the course, the student will be able to:  
Demonstrate comprehensive knowledge, clear understanding and the competent skills in dealing with glycosides, tannins, carbohydrates, bitter principals, minerals, natural carotenoids, resins and resin combination and natural antioxidants.

## 2-Intended Learning Outcomes of Phytochemistry I

<b>A- Knowledge and Understanding</b>	
a1	Define, state and classify certain classes of natural products (glycosides, tannins, carbohydrates, bitter principals, minerals, natural carotenoids, resins and resin combination and natural antioxidants) and their physical properties.
a2	Describe the chemistry of the above mentioned classes, their pharmacological properties (biological activities) and contra-indications.
a3	Identify different analytical techniques used in natural products determination for the above mentioned classes, their methods of isolation, purification and identification.
a4	Identify natural and pharmaceutical products containing glycosides, tannins, carbohydrates, bitter principals, minerals, natural carotenoids, resins and resin combination and natural antioxidants.
<b>B- Professional and Practical skills</b>	
b1	Handle chemicals, solvents and equipment safely.
b2	Choose the proper pharmaceutical terms and abbreviations for certain classes of natural (glycosides, tannins, carbohydrates, bitter principals, minerals, natural carotenoids, resins and resin combination .(and natural antioxidants
b3	Examine different glycosides, tannins, carbohydrates, resins and resin combination and natural antioxidants.
b4	Prepare lab research reports on glycosides, tannins, carbohydrates, bitter principals, minerals, natural carotenoids, resins and resin combination and natural antioxidants.
<b>C- Intellectual skills</b>	
c1	Estimate certain classes of naturally occurring products (glycosides, tannins, carbohydrates, bitter principals, minerals, natural carotenoids, resins and resin combination and natural antioxidants).
c2	Predict the appropriate method for isolation and purification of different glycosides, tannins, carbohydrates, bitter principals, minerals, natural carotenoids, resins and resin combination and natural antioxidants.
<b>D- General and Transferable skills</b>	
d1	Work effectively as a member of a team.
d2	Manage time to achieve targets within deadlines.
d3	Write and present reports.
d4	Develop critical thinking and problem-solving skills.

## D- Contents:

<b>Week No.</b>	<b>Lecture (2hrs/week)</b>	<b>Practical session (2hrs/week)</b>
<b>1</b>	<b>Glycosides</b> Classification, isolation and properties	General properties of glycosides and extraction methods
<b>2</b>	<b>Glycosides</b> Phenolic glycosides, cyanogenic glycosides, thioglycosides	Chemical tests for cardiac glycosides and flavonoids.
<b>3</b>	<b>Glycosides</b> Cardiac glycosides	(Activity) Get a copy of pamphlets for pharmaceutical products containing glycosides
<b>4</b>	<b>Glycosides</b> Flavonoids and coumarins	Chemical tests for anthraquinones and saponins.
<b>5</b>	<b>Glycosides</b> Anthraquinones, saponins and miscellaneous glycosides	Chemical tests for tannins and antioxidants.
<b>6</b>	<b>Tannins and antioxidants</b>	(Activity) Get a copy of pamphlets for pharmaceutical products containing glycosides, tannins and antioxidants
<b>7</b>	<b>Midterm written exam</b>	
<b>8</b>	<b>Carbohydrates</b> Definition, classification, properties, evaluation, drugs containing carbohydrates	General properties of carbohydrates Chemical tests for monosaccharides
<b>9</b>	<b>Carbohydrates</b> Heteropolysaccharides and holopolysaccharides	Chemical tests for disaccharides
<b>10</b>	<b>Bitter principals</b>	Chemical tests for polysaccharides
<b>11</b>	<b>Minerals</b>	Chemical tests for resins and resin combination Activity)

		Get a copy of pamphlets for pharmaceutical products containing carbohydrates and resins and resin combination in pharmaceutical products Lab research report on different studied classes in theoretical part
<b>12</b>	<b>Natural carotenoids</b>	<b>Practical exam 1</b>
<b>13</b>	<b>Resins and resin combination</b>	<b>Practical exam 2</b>
<b>14</b>	<b>Revision.</b>	
<b>15</b>	<b>Written exam</b>	

### **E- Teaching and Learning Methods:**

- Lectures.
- Interactive lectures.
- Practical sessions.
- Self-learning (group discussion, net search).
- Visits to community pharmacy to get copy of pamphlets for pharmaceutical products containing studied natural products.

### **F- Student Assessment Methods:**

- 1- Written exam (midterm, final) to assess a1, a2, a3, a4, b1,c1, c2, and d4.
- 2- Activity to assess b3, c1, c2, c3, d1, d2, d3 and d4.
- 3- Practical exam to assess b1, b2, b3.

4- Oral exam to assess a1, a2, a3, a4, b1, c1, c2 and d4.

#### **Assessment schedule:**

<b>Assessment (1):</b> Midterm written exam	Week 7
<b>Assessment (2):</b> Activity	Weeks 3, 6, 11
<b>Assessment (3):</b> Practical exam	Weeks 12, 13
<b>Assessment (4):</b> Final written exam	Week 15
<b>Assessment (5):</b> Oral exams	Week 15

#### **Weighting of Assessment:**

<b>Assessment method</b>	<b>Marks</b>	<b>Percentage</b>
<b>Midterm written exam</b>	10	10%
<b>Activity</b>	5	5%
<b>Practical exam</b>	20	20%
<b>Final written exam</b>	50	50%
<b>Oral exam</b>	15	15%
<b>TOTAL</b>	100	100%

#### **G- Facilities Required for Teaching and Learning:**

- Black (white) board, Data show, Laboratory equipment (water bath, polarimeter, melting point apparatus, digital balances and glassware) and Chemicals.

#### **H- List of References:**

##### **1- Course Notes:**

Department offering the program: -----

Department offering the course: **Pharmacology and toxicology department**

Academic year / Level: **Third year / Second term**

Date of specification approval: February 2019

### B- Basic information:

Title: Pharmacology II Code: **PT323**

Credit Hours: -----

Lectures: 2hrs/week

Practical: 2hrs/week

Tutorials: ---

Total: 3hrs/week

### C- Professional information:

#### 1-Overall Aims of the Course

On completion of the course, students will be able to:

- Explain body functions as well as clinical features of different diseases that were not covered in Pharmacology (1) to determine appropriate pharmacological therapy.
- Build up comprehensive knowledge about essential bases of pharmacology and how to apply these bases in their professional life as pharmacists in community.

## 2-Intended Learning Outcomes of (ILOS)

<b>A- Knowledge and Understanding</b>	
a1	Illustrate disorders in body functions associated with various disease states.
a2	Demonstrate etiology, epidemiology and clinical features of different diseases.
a3	Describe pharmacological properties of drugs.
<b>B- Professional and Practical Skills</b>	
b1	Apply lab safety measures.
b2	Practice the basics handling of experimental animals & routes of drugs administration.
b3	Perform in vivo experiments to determine pharmacological properties of drugs in a professional manner.
<b>C- Intellectual Skills</b>	
c1	Select the proper drug in various disease conditions based on drug-related information.
c2	Assess information from different sources in the field of pharmacology.
<b>D- General and Transferable Skills</b>	
d1	Work effectively as a member of a team.
d2	Develop calculation skills
d3	Present information as a written report

## D- Contents:

Week No.	Lecture (2hrs/week)	Practical Session (2hrs/week)
1	<ul style="list-style-type: none"> <li>Degenerative disorders and spasticity.</li> </ul>	<ul style="list-style-type: none"> <li>Lab safety measures</li> <li>Handling of experimental animals and routes of drugs administration (mice) (1)</li> </ul>
2	<ul style="list-style-type: none"> <li>Drugs used for treatment of anxiety and sleep disorders.</li> <li>Treatment of depression and mania.</li> <li>Drugs used for treatment of mania and bipolar disorder</li> </ul>	<ul style="list-style-type: none"> <li>Lab safety measures</li> <li>Handling of experimental animals and routes of drugs administration (mice) (2)</li> </ul>
3	<ul style="list-style-type: none"> <li>Drugs used for treatment of psychosis and anxiety.</li> </ul>	<ul style="list-style-type: none"> <li>Handling of experimental animals and routes of drugs administration (frogs) (1)</li> </ul>
4	<ul style="list-style-type: none"> <li>Antiepileptic drugs.</li> </ul>	<ul style="list-style-type: none"> <li>Handling of experimental animals and routes of drugs administration (frogs) (2)</li> </ul>
5	<ul style="list-style-type: none"> <li>Pain control with general and local anaesthetics.</li> </ul>	<ul style="list-style-type: none"> <li>CNS stimulants (1)</li> </ul>
6	<ul style="list-style-type: none"> <li>Central nervous system stimulants.</li> </ul>	<ul style="list-style-type: none"> <li>CNS stimulants (2)</li> </ul>

14	<ul style="list-style-type: none"> <li>Drugs used for treatment of anemia</li> <li>Hematopoietic growth factors.</li> </ul>	
15	<ul style="list-style-type: none"> <li>Final written exam</li> </ul>	

## **E- Teaching and Learning Methods:**

- Lectures
- Practical sessions
- Open discussion, self-learning.

## **F- Student Assessment Methods:**

- 1- Written exam (midterm and final) to assess: a1, a2, a3, c1, c2
- 2- Activity (report) to assess d1, d3
- 3- Practical exam to assess: b1, b2, b3, d1, d2, d3
- 4- Oral exam to assess: a1, a2, a3, c1, c2

## **Assessment Schedule:**

<b>Assessment (1):</b> Final written exam	Week 15
<b>Assessment (2):</b> Practical exam	Weeks12, 13
<b>Assessment (3):</b> Oral exam	Week 15
<b>Assessment (4):</b> Midterm exam	Week 7
<b>Assessment (5):</b> Activity (report)	Weeks 10,11

## **Weighting of Assessment:**

<b>Assessment method</b>	<b>Marks</b>	<b>Percentage</b>
<b>Midterm exam</b>	<b>10</b>	<b>10%</b>
<b>Final written exam</b>	<b>50</b>	<b>50%</b>
<b>Activity (Report)</b>	<b>5</b>	<b>5%</b>
<b>Practical exam</b>	<b>20</b>	<b>20%</b>
<b>Oral exam</b>	<b>15</b>	<b>15%</b>
<b>TOTAL</b>	<b>100</b>	<b>100%</b>

## **F- Facilities required for teaching and learning:**

- Black (white) board, Data show, Laboratory equipment, laboratory animals and Chemicals.

## **H- List of References:**

**1- Course Notes:** Student book of Pharmacology (2) approved by the Pharmacology and toxicology department (2019)

- Practical notes of Pharmacology (2) approved by the Pharmacology and

toxicology department (2019)

## **2- Essential Books:**

- i- Rang & Dale pharmacology (eighth edition); Churchill Livingstone (2015).
- ii- Katzung basic and clinical pharmacology (fourteenth edition); McGraw Hill Lang. (2017).

## **3- Recommended Books**

- i- Lippincott illustrated reviews-pharmacology (seventh edition) (2018).
- ii- Tripathi Essentials of Medical Pharmacology (eighth edition) (2018)

## **4- Periodicals and websites:**

- Aquilina A. The extemporaneous compounding of paediatric medicines at Mater Dei Hospital. Journal of the Malta College of Pharmacy Practice. Issue 19, 28 – 30, 2013.

**COURSE  
SPECIFICATIONS**

**Biochemistry -2**

**Third year – secondTerm  
2018-2019**

## Course Specification of Biochemistry (2)

---

**University:** Zagazig **Faculty:** Pharmacy

### A- Course specifications:

Program(s) on which the course is given: Bachelor of Pharmacy  
Major or Minor element of programs: Major  
Department offering the program: -----  
Department offering the course: Biochemistry Department  
Academic year/ Level: 2018/2019 Third year /second term  
Date of specification approval: 27/8/2018

### B- Basic information:

Title: Biochemistry (2) Code: BC321  
Credit Hours: ---  
Lectures: 3 hrs/week  
Practical: 2 hrs/week  
Tutorials: ---  
Total: 4 hrs/week

### C- Professional information:

#### 1-Overall Aims of the Course:

On completion of the course, students will be able to:

- Illustrate the different metabolic pathways of carbohydrates, lipids, proteins and integration of metabolism.
- Analyze and interpret experimental results.

## 2-Intended Learning Outcomes of Biochemistry (2) (ILOs):

<b>A- Knowledge and Understanding</b>	
a1	Outline the principles of food staff, absorption and digestion.
a2	Illustrate different metabolic pathways of carbohydrates, lipids and proteins.
a3	Discuss regulatory factors affecting different metabolic pathways.
<b>B- Professional and Practical skills</b>	
b1	Handle biological samples safely.
b2	Perform laboratory tests for biological samples to detect different types of lipids and metabolites.
b3	Interpret laboratory results in suitable form.
<b>C- Intellectual skills</b>	
c1	Apply different biological methods used to assay different metabolites and biological samples.
c2	Correlate between different metabolic pathways
<b>D- General and Transferable skills</b>	
d1	Work effectively as a member of a team.
d2	Write and present reports effectively.
d3	Develop self-learning skills.

## D-Contents:

<b>Week No.</b>	<b>Lecture (3 hrs/ week)</b>	<b>Practical session (2 hr/week)</b>
<b>1</b>	<ul style="list-style-type: none"> <li>- Carbohydrates digestion and absorption</li> <li>- Metabolism of mono and disaccharides</li> <li>- Glycolysis (Reactions, steps and regulation)</li> </ul>	- Laboratory safety measures
<b>2</b>	<ul style="list-style-type: none"> <li>- Gluconeogenesis (Reactions and regulation)</li> <li>- Tricarboxylic acid cycle (Reactions, regulation and calculation of energy produced)</li> </ul>	<ul style="list-style-type: none"> <li>-Lipid metabolism</li> <li>-Lipid profile</li> <li>-Determination of triglycerides</li> </ul>
<b>3</b>	<ul style="list-style-type: none"> <li>- HMP shunt (Reactions and functions)</li> <li>- Uronic acid pathway (Reactions)</li> </ul>	-Determination of cholesterol

<b>5</b>	<ul style="list-style-type: none"> <li>- Digestion and absorption of lipids</li> <li>Plasma lipids</li> <li>- Oxidation of fatty acids</li> </ul>	-Lipid metabolism abnormalities case.
<b>6</b>	<ul style="list-style-type: none"> <li>- Lipogenesis</li> <li>- Lipolysis in adipose tissues.</li> <li>- Phospholipid metabolism</li> </ul>	<ul style="list-style-type: none"> <li>-Protein metabolism.</li> <li>-Determination of serum urea level.</li> </ul>
<b>7</b>	Midterm exam	
<b>8</b>	<ul style="list-style-type: none"> <li>- Ketone bodies metabolism</li> <li>- <b>Self-learning activities (Diabetes – glycogen storage disease)</b></li> </ul>	-Determination of serum uric acid level.
<b>9</b>	<ul style="list-style-type: none"> <li>- Cholesterol metabolism</li> <li>- Lipoproteins metabolism</li> <li>- <b>Self-learning activities (fatty liver)</b></li> </ul>	-Protein metabolism abnormalities case.
<b>10</b>	<ul style="list-style-type: none"> <li>- Protein turnover</li> <li>- Digestion and absorption of dietary proteins.</li> <li>- Nitrogen metabolism</li> <li>- Transamination</li> </ul>	- Revision / Quiz
<b>11</b>	<ul style="list-style-type: none"> <li>- Deamination</li> <li>-Transdeamination</li> <li>- Metabolism of ammonia</li> <li>- Urea cycle</li> <li>- <b>Self-learning activities (Growth</b></li> </ul>	- Activity presentation.

	formula, benefits and hazards)	
<b>12</b>	- Conversion of amino acids to specialized products	-Practical exam
<b>13</b>	- Conversion of amino acids to specialized products (continue) - Metabolic correlation associated with some diseases	
<b>14</b>	- Revision	
<b>15</b>	-Final exam	

## E- Teaching and Learning Methods:

- Interactive lectures
- Practical sessions
- Case study
- Self-learning (activity: reports and presentations)

## F- Student Assessment Methods:

1- Written exam	to assess	a1, a2, a3, c2
2- Practical exams	to assess	b1, b2, b3, c1
3- Activities	to assess	d1, d2, d3
4- Oral exam	to assess	a1, a2, a3, c2
5- Midterm exam	to assess	a1, a2, a3, c2

## Assessment schedule:

<b>Assessment (1):</b> Written exam	Week 15
<b>Assessment (2):</b> Activity	Week 8,9,11
<b>Assessment (3):</b> Practical exams	Week 12
<b>Assessment (4):</b> Oral exams	Week 15
<b>Assessment (5):</b> Midterm exam	Week 7

### Weighting of Assessment:

Assessment method	Marks	Percentage
Written exam	75	50%
Midterm exam	15	10%
Activity	10	7 %
Practical exam	30	20%
Oral exam	20	13%
<b>TOTAL</b>	150	100%

### G- Facilities Required for Teaching and Learning:

- Black/white board, screens, Laboratory equipment (glassware, spectrophotometer, centrifuge, digital balances) and Chemicals.

### H- List of References:

#### 1- Course Notes:

- Student book of Biochemistry (2) approved by biochemistry department 2018.
- Practical notes of Biochemistry (2) approved by biochemistry department 2018.

#### 2- Essential books:

- Marks' basic medical biochemistry: a clinical approach (fifth edition); Lieberman M., Marks A.D., Peet MD, Alisa. (2017).
- Lehninger principles of biochemistry (seventh edition); Nelson D.L.; Cox M.M. (2017).
- Basic concepts in biochemistry; Gilbert H.F.; The Mc Graw Hill companies Inc. (2000).
- Lippincott's Illustrated Reviews: Biochemistry (Seventh edition) ; Ferrier D.R. (2017)

### 3- Recommended books:

- Biochemistry (sixth edition); Garrett R.H. and Grisham C.M.; Thomson learning, Inc (2016).
- Harper's Illustrated Biochemistry (31<sup>st</sup> edition); [Rodwell](#) V.W., [Bender](#) D., [Botham](#) K.M., [Kennelly](#) P.J., [Weil](#) P. A. (2018).
- Clinical Biochemistry made ridiculously simple (third edition); Stephen Goldberg. M.D.; Med Master Inc. (2010).

**COURSE  
SPECIFICATIONS**

**Parasitology and  
Pathology**

**Third year – secondTerm  
2018-2019**

## **Course Specification of Parasitology and Pathology**

---

**University:** Zagazig **Faculty:** Pharmacy

### **A- Course specifications:**

Programme(s) on which the course is given: Bachelor of Pharmacy

Major or Minor element of programmes: Major

Department offering the program: -----

Department offering the course: Microbiology Department

Academic year/level: third year/ Second term

Date of specification approval: September 2018

### **B- Basic information:**

Title: Parasitology and Pathology **Code: MI322**

Credit Hours: ---

Lectures: 2 hrs/week

Practical: 1 hr/week

Tutorials: ---

Total: 2.5 hrs/week

### **C- Professional information:**

#### **1-Overall Aims of the Course:**

#### **On completion of the course, students will be able to:**

Underline the basic concepts of parasitology, entomology and pathology. Examine of different parasites as well as different pathological diseases under microscope. Specify the appropriate methods for treatment, prevention and control of different diseases caused by parasites and insects. Develop critical thinking and effective communication skills with patients and other health care professionals.

## 2-Intended Learning Outcomes of Parasitology and Pathology Course (ILOs):

<b>A- Knowledge and Understanding</b>	
a1	Illustrate the basic concepts of parasitology.
a2	Summarize the principles of entomology and diseases caused by insects.
a3	Identify the basic fundamentals of pathology.
a4	Recognize etiology, epidemiology and clinical features of different diseases caused by parasites and insects.
a5	Determine the etiology of disease and response of cells to various injurious agents.
a6	Outline the laboratory diagnosis of diseases caused by different parasites.
<b>B- Professional and Practical skills</b>	
b1	Use the proper terms of parasitology, entomology and pathology.
b2	Select drugs for treatment of different diseases caused by parasites.
b3	Perform microscopical examination of different parasitic stages and insects from different specimens.
b4	Identify pathological slides for different diseases.
<b>C- Intellectual skills</b>	
c1	Suggest the appropriate methods for treatment, prevention and control of different parasites and insects.
c2	Analyze and interpret experimental results for identification of parasites, insects and pathological diseases in suitable form.
<b>D- General and Transferable skills</b>	
d1	Communicate efficiently in oral and written manner.
d2	Develop internet search and computer skills.
d3	Demonstrate critical thinking, decision-making and problem-solving in dealing with case study.

## D- Contents:

Week No.	Lectures (2 hrs/week)	Practical session (1hr/week)
<b>1</b>	- General Introduction	- General Introduction – General terms of parasitology
<b>2</b>	- Helminthology 2a-Trematodes: - General characters - Fasciola species - Short essay questions	- Parasitological laboratory examination: - Sample collection - Evaluation of different techniques used in the diagnosis of parasitic infections:  - Microscopical - Serology - Modern molecular techniques (e.g. PCR)
<b>3</b>	- Heterophyes species - Schistosoma species - Case report	- Demonstration of microscopic slides of morphologic stages of: - Fasciola species - Heterophyes species - Schistosoma species - Demonstration of Snails hosts
<b>4</b>	Cestodes: - General characters - Taenia saginata - Taenia solium - Cysticercosis Case report	- Demonstration of microscopic slides of morphologic stages of: Taenia saginata Taenia solium
<b>5</b>	- Echinococcus sp. - Hymenolepis sp. - Diphylobothrium sp. Nematodes: - General characters - Ascaris lumbricoides - Hook worm sp.	Demonstration of microscopic slides of morphologic stages of : - Echinococcus sp. - Ascaris lumbricoides - Hook worm sp. - <b>Activity (poster preparation)</b>
<b>6</b>	- Enterobius & Trichuris - Trichinella spiralis - Wuchereria species - Case report	Demonstration of microscopic slides of morphologic stages of: - Enterobius & Trichuris - Trichinella spiralis - Wuchereria species
<b>7</b>	Midterm exam

<b>15</b>	Written exam	

### **E- Teaching and Learning Methods:**

- Lectures
- Practical sessions
- Self learning (Activity, Internet search, case report, poster preparation)
- Case study

### **F- Student Assessment Methods:**

- 1- Written exam to assess a1, a2, a3, a4, a5, a6, c1, d3
- 2- Activity to assess d2, d3
- 3- Practical exam to assess b1, b2, b3, b4, c2, d1,
- 4-oral exam to asses: ....a1, a2, a3, a4, a5, a6, c1, d1, d2

### **Assessment schedule:**

<b>Assessment (1):</b> Written exams	Week 15
<b>Assessment (2):</b> Activity	Week 5
<b>Assessment (3):</b> Midterm exam	Week 7
<b>Assessment (4):</b> Practical exam	Week 13
<b>Assessment (4):</b> oral exam	Week 15

### **Weighting of Assessment:**

Assessment method	Marks	Percentage
<b>Written exam</b>	50	50%
<b>Activity</b>	5	5%
<b>Practical exam</b>	20	20%
<b>Mid-term exam</b>	10	10%
<b>Oral exam</b>	15	15%
<b>TOTAL</b>	100	100%

## **G- Facilities Required for Teaching and Learning:**

- Black (white) board, data show, microscopes.

## **H- List of References:**

### **A- Parasitology:**

1- Student book of Parasitology and pathology-Lecture approved by Microbiology department & practical notes by staff of the department 2018.

### **2- Essential Books:**

i- Medical Parasitology (9<sup>th</sup> edition); Markell and Voge's, W.B. Saunders Company (2006).

ii- District Laboratory practice in Tropical countries.

iii- MONICA CHEESBROUGH, Printed in Great Britain at University press, Cambridge (2005).

iv- Clinical Parasitology (ninth Edition); Beaver, P.C.; Jung, R.C. and Cupp, E.W. Lea & Febiger; Philadelphia (2019).

### **3- Recommended Books**

Manson's Tropical Diseases (23<sup>rd</sup> edition), Cook GC (ed), London: WB Saunders (2013).

### **4- Periodicals, Web Sites**

**COURSE  
SPECIFICATIONS**

**Medicinal Chemistry-2**

**Third year – secondTerm  
2018-2019**

## Course specification of Medicinal Chemistry (2)

---

**University:** Zagazig **Faculty:** Pharmacy

### A- Course specifications:

Programme(s) on which the course is given: Bachelor of Pharmacy  
Major or Minor element of programmes: Major  
Department offering the program: -----  
Department offering the course: Medicinal chemistry department  
Academic year/level: third year/ Second term  
Date of specification approval: 26/11/2018

### B- Basic information:

Title: MC321 **Code: MC321**  
Credit Hours: ---  
Lectures: 2 hrs/week  
Practical: 2 hr/week  
Tutorials: ---  
Total: 3 hrs/week

### C- Professional information:

#### 1-Overall Aims of the Course:

**On completion of the course, students will be able to:**

On completion of the course, the student will be able to enumerate the therapeutic drugs of different uses with their mode of action and synthetic pathways (antimycobacterium, antineoplastic, antiviral, oral hypoglycemic, diagnostic agents, cardiovascular acting drugs and diuretics).

## 2- Intended Learning Outcomes (ILOs):

<b>A- Knowledge and Understanding:</b>	
a1	Describe basics of chemistry of different drug classes (antimycobacterium, antineoplastic, antiviral, oral hypoglycemic, diagnostic agents, cardiovascular acting drugs and diuretics).
a2	Outline synthetic pathways of the aforementioned drugs.
a3	Recognize mode of action & SAR of the aforementioned drugs.
<b>B- Professional and Practical skills:</b>	
b1	Handle basic laboratory equipments and chemicals effectively and safely.
b2	Identify the active substances (sulfa drugs, aliphatic & aromatic acids & sodium salts).
b3	Establish a research study for assay and analysis of commercial drugs (boric acid and compare results with the pharmacopeia).
<b>C- Intellectual skills:</b>	
c1	Develop GLP guide lines in pharmacy practice through learning different analytical techniques.
c2	Predict quantitative and qualitative methodology of raw materials (boric acid, hexamine, hydrogen peroxide) and pharmaceutical preparations.
<b>D-General and Transferable skills:</b>	
d1	Work effectively as a member of a team with other students.
d2	Write reports and present it.
d3	Develop problem solving and decision making skills.

## D- Contents:

<b>Week No.</b>	<b>Lecture contents (2 hrs/lec.)</b>	<b>Practical session (2hrs/lab)</b>
1	Antimycobacterium agents.	Laboratory safety measures.
2	Antineoplastic agents (Alkylating agents).	Quantitative estimation of boric acid.
3	Antineoplastic agents (Alkylating agents, antimetabolites).	Quantitative estimation of hexamine.
4	Antineoplastic agents (antimetabolites, hormones)	Quantitative estimation of tolbutamide.
5	Antiviral agents (host cell penetration inhibitors and nucleic acid inhibitors).	General Scheme Activity 1 (Reports).
6	Antiviral agents (protein inhibitors).	- Identification of boric acid, borax, urea and hexamine.
7	Midterm exam	
8	Oral hypoglycemic agents (sulfonylurea derivatives)	-Identification of sulpha drugs.
9	Oral hypoglycemic agents (biguanide derivatives) Diagnostic agents	-Identification of organic acids and its salts of pharmaceutical use.
10	Antianginal agents & antiarrhythmic drugs	-Identification of iron, zinc and magnesium salts of pharmaceutical use. -Activity 2 (Reports).
11	Antihypertensive agents	Revision scheme 1.
12	Anticoagulants & Antihyperlipidemic agents.	Revision scheme 2.
13	Diuretics (water and osmotic agents, acidifying salts, mercurials, $\alpha,\beta$ unsaturated ketones, purines, pyrimidines)	Practical exam.
14	Diuretics (sulfonamide derivatives and endocrine antagonists)	Practical exam.
15	Final written exam	

## E- Schedule of Assessment Tasks for Students During the Semester:

- 1- Written exam to assess a1, a2, a3, c1, c2  
 2- Activity to assess d1, d2, d3  
 3- Practical exam to assess b1, b2,b3, c1, c2, d1, d2, d3  
 4- Oral exam to assess a1, a1, a3, c1, c2

	Assessment task (e.g. essay, test, group project, examination, speech, oral presentation, etc.)	Week Due	Proportion of Total Assessment
1	midterm exam	Week 7	10 %
2	Activity (Reports)	Weeks 5, 10	5 %
3	Practical exam	Weeks 13,14	20 %
4	Written exam	Week 15	50 %
5	Oral exam	Week 15	15 %
Total			100 %

### **F- Facilities required for teaching and learning:**

1. Black (white) board.
2. Data show Presentation.
3. Explanatory videos.
4. Laboratory equipment (test tubes, piurettes and conical flasks).
5. Chemicals.

### **G-Teaching and learning methods:**

- Lectures.
- Practical sessions.
- Activity (Reports).
- Self learning

### **H- List of References:**

1- Course Notes:

- Practical notes of Medicinal chemistry (2) approved by medicinal chemistry department 2018-2019.

2- Essential Books:

- Foye's Principles of Medicinal Chemistry; Williams, David A., William O. Foye, and Thomas L. Lemke; Lippincott Williams and Wilkins (2016).
- B.p. &U.S Pharmacopia (1988-2017)
- An Introduction to Medicinal Chemistry; Patrick, Graham L, Oxford (2017)

3- Periodicals, Web Sites, etc
