# **COURSE SPECIFICATIONS**

# Faculty of Pharmacy

(Clinical Pharmacy Program)

Fifth level - Semester 9

2018-2019

# **CONTENTS:**

| 1.        | Toxicology and forensic chemistry |
|-----------|-----------------------------------|
| 2.        | Therapeutics- 1                   |
| 3.        | Clinical pharmacokinetics         |
| 4.        | Oncology                          |
| <b>5.</b> | Clinical nutrition                |
| 6.        | Clinical pharmacology             |
| 7.        | Sociology                         |
| 8.        | Ouality Assurance and GMP         |

# **COURSE SPECIFICATIONS**

Toxicology & forensic chemistry

Fifth level –Semester 9

2019-2020

# Course specification of toxicology and forensic chemistry

University: Zagazig Faculty: Pharmacy

## **A- Course specifications:**

Program (s) on which the course is given: Bachelor of Pharmacy

(Clinical Pharmacy)

Major or Minor element of programs: Major

Department offering the program: ------

Department offering the course: pharmacology and toxicology

Department

Academic year Level: Fifth year/ semester 9

Date of specification approval: October 2019

#### **B- Basic information:**

Title: Toxicology and forensic chemistry

Code: PO 904

Credit Hours: ---

Lectures: 2 hrs/week

Practical: 1 hr/week

Tutorials: ---

Total: 3 hrs/week

#### **C- Professional information:**

#### 1-Overall aim of the course

Explain the mechanism of toxicity, target organ and treatment with different drug groups as well as forensic chemistry applications.

# 2- Intended Learning Outcomes of Toxicology and forensic chemistry (ILOs)

| <b>A-</b>    | Knowledge and Understanding  |
|--------------|--|
| a1           | Outline the basic mechanism of toxicity.   |
| a2           | Define forensic chemistry and its basic applications.                              |
| a3           | Illustrate the response of different body systems to toxicity.                     |
| a4           | Demonstrate the toxic effects of some drug groups and other agents.                |
| a5           | Describe the basic approach for the treatment of toxicity                          |
| <b>B</b> - ] | Professional and Practical skills  |
| b1           | Handle and dispose chemicals safely.   |
| b2           | Assess toxicity profiles of some xenobiotics.                                      |
| b3           | Detect the presence of poisons in purified samples.                                |
| b4           | Monitor the toxic effects of some agents on blood and tissue samples.              |
| <b>C</b> -   | Intellectual skills  |
| c1           | Determine the risk of drug use according to the target organ of toxicity.          |
| c2           | Integrate information from different sources to solve forensic chemistry problems. |
| D-(          | General and Transferable skills  |
| d1           | Work effectively as a member of teamwork   |

## **D- Contents:**

| Week | Lecture contents (2 hrs/week)                                | Practical session (1 hr/week)                                  |
|------|--|--|
| No.  |  |  |
| 1    | - Introduction to toxicology/ILOS                            | - Dermatology cases 1  |
|      |  | (electrical burn, frost bite)                                  |
| 2    | - Approach to treatment                                      | - Dermatology cases 2  |
|      |  | Allergic contact dermatitis, photo allegic contact dermatitis) |
| 3    | - Toxic effects of heavy metals-1                            | - case study on heavy metals 1                                 |
|      |  | (lead, arsenic and cadmium)                                    |
| 4    | - Toxic effects of heavy metals-2                            | - case study on heavy metals 2                                 |
|      |  | (Iron, mercury and copper)                                     |
| 5    | - Toxic effects of heavy metals-3                            | - Pesticides (case studies) 1                                  |
|      |  | (Organophosphorous pesticides,                                 |
|      | TD 1 CC 1 C 111  | pyrethroid type I & II)  |
| 6    | - Toxic effects of pesticides                                | Pesticides (case studies) 2                                    |
|      | - periodical exam  | (Out and all anima markini day)                                |
|      |  | (Organochlorine pesticides:<br>Lindane and chlordane)          |
| 7    | - Periodical exam  | - case study on vapour   |
| ,    | - Teriodical exam  | (Carbon momoxide, cyanide and                                  |
|      |  | iodine)  |
| 8    | - Toxic effects of solvents & vapors                         |  |
| 9    | Toxic response of immune                                     | - case study on solvents                                       |
| ,    | system/respiratory system                                    | (Ethanol and methanol)   |
| 10   | - Toxic responses of the kidney/liver                        | - Blood spots  |
|      |  | -  |
| 11   | - Toxic responses of the heart & vascular                    | - Tissue spots   |
|      | System  Toxic responses of the visual system &               |  |
|      | - Toxic responses of the visual system & the nervous systems |  |
| 12   | - Blood as a target organ                                    | - Teratogenicity   |
|      |  | 1 oracogometry   |
| 13   | - Food Poisoning & Animal poisons                            | Dragatical arrang 1  |
| 1.4  | Toroto ganiaity  | - Practical exam 1   |
| 14   | - Teratogenicity   | - Practical exam 2   |
| 15   | - Final exam   |  |
|      |  |  |

## **E- Teaching and Learning Methods:**

- Lectures
- Practical sessions
- Think/pair/share
- Case study

#### F- Student Assessment methods:

1- Written exams to assess: a1, a2, a3, a4, a5, c1,c 2

2- Practical exams to assess: b1,b2,b3,b4,

3- Oral exam to assess: a1, a2, a3, a4, a5, c1,c 2

4-Activity to assess: c2, d1

#### **Assessment schedule**

| Assessment (1): periodical exam | Week 7      |
|---------------------------------|-------------|
| Assessment (2): Practical exam  | Week 13, 14 |
| Assessment (3): Oral exam       | Week 15     |
| Assessment (4): Written exam    | Week 15     |

## **Weighting of Assessment**

| Assessment method | Marks | Percentage |
|-------------------|-------|------------|
| periodical exam   | 10    | 10%        |
| Practical exam    | 25    | 25%        |
| Oral exam         | 15    | 15%        |
| Written exam      | 50    | 50%        |
| TOTAL             | 100   | 100%       |

## G- Facilities required for teaching and learning:

- For lectures: Black (white) boards, data show, air conditioned classroom
- For practical: Well-equipped labs, Laboratory equipment and Chemicals

### **H-List of References:**

- **1- Course Notes:** Student book of Toxicology approved by Toxicology and Pharmacology department (2018)
- Practical notes of Toxicology (1) approved by Toxicology and Pharmacology department (2018)

#### 2- Essential Books:

- i- Goodman & Gilman's: The pharmacological basis of therapeutics (tenth edition); Hardman, Limbird, Gillman; McGraw-Hill Companies USA (2001).
- ii- The Basic Science of Poison (fifth edition); Klassen C.; McGraw-Hill Companies USA (1996).

#### **3- Recommended Books:**

i- Integrated Pharmacology; Curtis, Suiter, Walker, Hottman; Mosby, London, UK (1997).

#### 4- Periodicals and websites:

- Aquilina A. The extemporaneous compounding of paediatric medicines at Mater Dei Hospital. Journal of the Malta College of Pharmacy Practice. Issue 19, 28 – 30, 2013.

## **Course specification of Therapeutics-1**

\_\_\_\_\_

University: Zagazig Faculty: Pharmacy

### **A- Course specifications:**

Program (s) on which the course is given: Bachelor of Pharmacy (Clinical

pharmacy).

Major or Minor element of programs: Major

Department offering the program: ------

Department offering the course: Pharmacology and Toxicology

Academic year Level: Fifth Level – 9<sup>th</sup> semester

Date of specification approval: October 2018

#### **B- Basic information:**

Title: Therapeutics-1 Code: PO 905

Credit Hours: ---

Lectures: 2 hrs/week

Practical: 1hr/week

Tutorials: ---

Total: 3 hrs/week

#### **C- Professional information:**

#### 1- Overall aim of the course

On completion of the course, the student will be able to explain the basis of therapeutics including etiology, clinical features, diagnosis and treatment of different disease as liver, menstrual, pediatrics and GIT disorders.

# 2- Intended Learning Outcomes (ILOs)

| A- ŀ | (nowledge and Understanding   |  |  |  |  |  |  |  |
|------|---|--|--|--|--|--|--|--|
| a1   | Illustrate etiology, epidemiology and clinical features of disorders as liver, menstrual, pediatrics and GIT disorders. |  |  |  |  |  |  |  |
| a2   | Outline the lab. diagnosis of disorders as liver, menstrual, pediatrics and GIT disorders.                              |  |  |  |  |  |  |  |
| a3   | Specify therapeutic regimens of disorders as liver, menstrual, pediatrics and GIT disorders.                            |  |  |  |  |  |  |  |
| a4   | Underline the bases of therapeutics, clinical pharmacology and evidence based medicine.                                 |  |  |  |  |  |  |  |
| B- F | B- Professional and Practical skills  |  |  |  |  |  |  |  |
| b1   | Select the drug of choice for different diseases according to the etiology and pathophysiology.                         |  |  |  |  |  |  |  |
| b2   | Advise patients for rational and irrational use of drugs.   |  |  |  |  |  |  |  |
| C- I | ntellectual skills  |  |  |  |  |  |  |  |
| c1   | Suggest the suitable drugs for various diseases based on pharmacological basis.   |  |  |  |  |  |  |  |
| c2   | Identify drug-drug interactions   |  |  |  |  |  |  |  |
| c3   | Analyze and interpret the given data for diagnosis of different disease.  |  |  |  |  |  |  |  |
| D-G  | General and Transferable skills   |  |  |  |  |  |  |  |
| d1   | Communicate effectively with patients and health care professional.   |  |  |  |  |  |  |  |

| d2 | Work as a team member.                              |
|----|---|
| d3 | Develop computer and internet communication skills. |
| d4 | Practice self-learning.                             |
| d5 | Write and present reports.                          |

#### **D- Contents:**

| Week | Lecture contents (2 hrs/lec.) | Practical session (1hrs/lab)    |  |  |  |  |  |
|------|-------------------------------|---------------------------------|--|--|--|--|--|
| No.  |                               |                                 |  |  |  |  |  |
| 1    | Liver disorders               | Case studies on liver disorders |  |  |  |  |  |
| 2    | Liver disorders               | Case studies on liver disorders |  |  |  |  |  |
| 3    | Liver disorders               | Case studies on liver disorders |  |  |  |  |  |
| 4    | Menstrual disorders           | Case studies on menstrual       |  |  |  |  |  |
|      |                               | disorders                       |  |  |  |  |  |
| 5    | Menstrual disorders           | Case studies on menstrual       |  |  |  |  |  |
|      |                               | disorders                       |  |  |  |  |  |
| 6    | Menstrual disorders           | Case studies on menstrual       |  |  |  |  |  |
|      |                               | disorders                       |  |  |  |  |  |
| 7    | Pediatrics (sepsis and        | Case studies on sepsis and      |  |  |  |  |  |
|      | meningitis, RSV, AOM)         | meningitis, RSV, AOM            |  |  |  |  |  |
|      | Midterm exam                  |                                 |  |  |  |  |  |
| 8    | Pediatrics (Vaccinations and  | Case studies on Vaccinations    |  |  |  |  |  |
|      | ADHD)                         | and ADHD                        |  |  |  |  |  |
| 9    | GIT disorders (GERD)          | Case studies on GERD            |  |  |  |  |  |
| 10   | GIT disorders (Peptic Ulcer)  | Case studies on Peptic Ulcer    |  |  |  |  |  |
| 11   | GIT disorders (Upper GI       | Case studies on upper GI        |  |  |  |  |  |
|      | bleeding)                     | bleeding                        |  |  |  |  |  |
| 12   | GIT disorders (IBD)           | Case studies on IBD             |  |  |  |  |  |
| 13   | Revision                      | Practical exam                  |  |  |  |  |  |
| 14   | Revision                      |                                 |  |  |  |  |  |
| 15   | Final exam                    |                                 |  |  |  |  |  |

# **E- Teaching and Learning Methods:**

- Lectures
- Practical sessions
- Think/pair/share
- Case study, Open discussion, self-learning

## F- Student Assessment methods:

- 1- Written exams (midterm and final) to assess: a1 to a4 and c1 to c3.
- 2- Practical exam and lab activity to assess: b1 and b2 and d1 to d5.
- 3- Oral exam to assess: a1 to a4, c1 to c3, d1 and d5.

#### **Assessment schedule**

| Assessment (1): Mid-term exam      | Week 7       |
|------------------------------------|--------------|
| Assessment (2): Lab Activity       | Week 1 to 12 |
| Assessment (3): Practical exam     | Week 13      |
| Assessment (4): Final written exam | Week 15      |
| Assessment (5): Oral exam          | Week 15      |

## **Weighting of Assessment**

| Assessment method               | Marks | Percentage |
|---------------------------------|-------|------------|
| Mid-term exam                   | 10    | 10%        |
| Practical exam and lab activity | 25    | 25%        |
| Final written exam              | 50    | 50%        |
| Oral exam                       | 15    | 15%        |
| TOTAL                           | 100   | 100%       |

## **G- Facilities required for teaching and learning:**

a. For lectures: Black (white) board, data show, air conditioned

classroom

**b.** For practical: Well-equipped labs

**H- List of References:** 

1. Course Notes: Student book of therapeutics-1 approved by the

Pharmacology and Toxicology department (2018) and practical notes

of therapeutics-1 approved by the Pharmacology and Toxicology

department (2018).

2. Essential Books:

a. American collage of clinical pharmacy updates in therapeutics

pharmacotherapy preparatory review and recertification course

(2017)

3. Recommended **Books:** Pharmacotherapy, pathophysiological

approach (tenth edition); DePero J., (2016).

4. Periodicals and websites: Medscape clinical guidelines updates

Course Coordinator: Prof. Dr. Mona Fouad

Clinical Pharmacokinetics
Fifth level –Semester 9

2019-2020

## **Course Specification of Clinical Pharmacokinetics**

\_

University: Zagazig Faculty: Pharmacy

**A- Course specifications:** 

Program(s) on which the course is given: Clinical pharmacy program

Major or Minor element of programs: Major

Department offering the program: ------

Department offering the course: Pharmacy practice department

Academic year/Level: Fifth level /ninth semester

Date of specification approval September 2019

**B- Basic information:** 

Title: Clinical Pharmacokinetics Code: PP 907

Credit Hours:

• Lectures : 2 hrs/week

• Practical: 1 hrs/week

• Tutorials: ---

• Total: 3 hrs/week

## **C- Professional information:**

## **1-Overall Aims of the Course:**

On completion of the course, students will be able to define clinical pharmacokinetics, linear and non linear pharmacokinetics, drug distribution and drug clearance mechanisms as well as concentration monitoring and application of pharmacokinetics in clinical situations. Students will be able to individualize drug therapy for drugs with narrow therapeutic index such as aminoglycosides, lithium, phenytoin and others.

## **2-Intended Learning Outcomes of Clinical Pharmacokinetics (ILOs):**

3. Intended learning outcomes (ILOs):

| 5. Intended learning outcomes (ILOs). |   |  |  |  |  |  |  |
|---------------------------------------|---|--|--|--|--|--|--|
| Knowledge                             | e and Understanding   |  |  |  |  |  |  |
| a1                                    | Define various terms related to basic pharmacokinetics including linear and nonlinear pharmacokinetics, clearance, volume of distribution, drug elimination, bioavailability, bioequivalence and concentration monitoring |  |  |  |  |  |  |
| a2                                    | Describe clinical pharmacokinetic variabilities related to different diseases including renal and hepatic dysfunction, obesity, heart failure, inflammatory disease, etc  |  |  |  |  |  |  |
| a3                                    | List the equations used to calculate drug clearance, elimination rate constant, volume of distribution and half life, creatinine clearance, drug dosage   |  |  |  |  |  |  |
| a4                                    | Outline therapeutic ranges and pharmacokinetic parameters for drugs with narrow therapeutic index which need therapeutic drug monitoring .e.g. aminoglycoside antibiotics, lithium, theophylline, digoxin and others      |  |  |  |  |  |  |
| Profession                            | al and practical skills   |  |  |  |  |  |  |
| b1                                    | Perform proper therapeutic monitoring of drugs with narrow therapeutic index .e.g. aminoglycoside antibiotics, lithium, theophylline, digoxin and others  |  |  |  |  |  |  |
| b2                                    | Calculate loading and maintenance dose of aminoglycoside antibiotics, lithium, theophylline, digoxin and others using the pharmacokinetic parameters method   |  |  |  |  |  |  |
| Intellectua                           | l skills  |  |  |  |  |  |  |
| c1                                    | Investigate the effect of age and disease state on pharmacokinetics of digoxin, aminoglycoside, phenytoin, and theophylline, etc  |  |  |  |  |  |  |
| c2                                    | Explain the change in drug pharmacokinetics using the graph technique   |  |  |  |  |  |  |
| General ar                            | nd Transferable Skills  |  |  |  |  |  |  |
| d1                                    | Develop problem solving and critical thinking skills  |  |  |  |  |  |  |
| d2                                    | Develop life long learning skills   |  |  |  |  |  |  |
| L                                     | 1   |  |  |  |  |  |  |

# **D- Contents:**

| Week<br>No. | Lecture contents (2 hrs/lec.)  | Practical session (1 hr/w)   |
|-------------|--|--|
| 1 2         | Course orientation Basic concepts:  Linear & nonlinear pharmacokinetics                | Calculate:<br>clearance<br>elimination half-life<br>bioavailability          |
|             | ➤ Clearance  |  |
|             | ➤ Volume of distribution   |  |
|             | ➤ Bioavailability  |  |
| 3<br>4<br>5 | Drug dosing in special populations: renal and hepatic disease  Dialysis  heart failure | Calculate: - creatinine clearance - child pugh score  TDM of aminoglycosides |
|             | <ul><li>obesity</li><li>drug interactions</li></ul>                                    |  |
| 6           | Aminoglycosides clinical pharmacokinetics  |  |
| 7           | Midterm exam   | TDM of digoxin   |
| 8           | Digoxin clinical pharmacokinetics  |  |
| 9           | Phenytoin clinical pharmacokinetics  | TDM of phenytoin   |
| 10          | Lithium clinical pharmacokinetics  | TDM of lithium   |
| 11          | Phenobarbital clinical pharmacokinetics  | TDM of phenobarbital   |
| 12          | Clinical pharmacokinetics and concentration monitoring                                 | TDM of theophylline  |
| 13          | Application of pharmacokinetics in clinical situation                                  | Delivery of activity report  |
| 14          | Discussion of Reseach papers about pharmacokinetics of different drugs                 | Practical exam   |
| 15          | Final written exam   |  |

## **E- Teaching and Learning Methods:**

- Lectures
- Case discussion
- Problem solving
- Think-pair-share
- Self learning

## **F- Student Assessment Methods:**

1- Written exams to assess a1, a2, a3, a4, c1, c2

2- Practical exam to assess b1, b2, d1

3-Students are asked to prepare a complete report about the pharmacokinetics

and dose adjustment of a selected drug to assess c1, d2

4- Oral exam to assess a1, a2, a3, a4, c1, c2

### **Assessment schedule:**

| Assessment (1): Midterm exam              | Week 7  |
|---|---------|
| Assessment (2): Practical exam            | Week 14 |
| Assessment (3): report delivery           | Week 13 |
| Assessment (4): Oral exam                 | Week 15 |
| <b>Assessment (5):</b> final written exam | Week 15 |

## **Weighting of Assessment:**

| Assessment method                | Marks | Percentage |
|----------------------------------|-------|------------|
| Written exam                     | 50    | 50%        |
| Practical exam & activity report | 25    | 25%        |
| Oral exam                        | 15    | 15%        |
| Midterm exam                     | 10    | 10%        |
| TOTAL                            | 100   | 100%       |

# **G- Facilities Required for Teaching and Learning:**

Black ( white ) boards, data show, air conditioned classroom equipped with sound system

Course Coordinator: Assistant Prof. Gehan Fathy Attia

### **Course Specification of Oncology**

\_\_\_\_\_

University: Zagazig Faculty: Pharmacy

#### **A- Course specifications:**

Program(s) on which the course is given: Bachelor of Pharmacy (Clinical

pharmacy)

Major or Minor element of programs: Major

Department offering the program:

Department offering the course: Clinical Oncology department

Faculty of Medicine

Academic year/Level: Fifth level/Ninth semester

Date of specification approval September 2018

#### **B- Basic information:**

Title: Oncology Code: PP 908

**Credit Hours:** 

Lectures : 2 hrs/week

Practical: 1 hrs/week

Tutorials: ---

Total: 3 hrs/week

#### **C- Professional information:**

#### **1-Overall Aims of the Course:**

On completion of the course, students will be able to explain the etiology, pathogenesis, genetics, clinical features, diagnosis of different types of tumors as well as their treatment.

# 2-Intended Learning Outcomes of Oncology (ILOs):

| A- K | Knowledge and Understanding  |
|------|--|
| a1   | Outline the principles of cancer disease.                              |
| a2   | Illustrate the basics of oncogenesis and molecular biology of cancer.  |
|      | Demonstrate etiology, risk factors and consequences of cancer          |
| a3   | development.   |
|      | Describe epidemiology, pathology, clinical signs and symptoms of       |
| a4   | Define prognostic factors, diagnosis and staging of various tumor      |
| a5   |  |
| us   | types.   |
|      | Determine fundamentals of treatment of the most common types           |
| a6   | of cancer and supportive care therapies.                               |
| B- P | Professional and Practical skills                                      |
|      | Use prepar medical terms and abbreviation of encology                  |
| b1   | Use proper medical terms and abbreviation of oncology.                 |
|      | Choose appropriate treatment of various kinds of tumor according       |
| b2   | to disease etiology and pathophysiology.                               |
| b3   | Determine the stage of cancer disease.                                 |
| C- I | ntellectual skills   |
| c1   | Interpret information needed in pharmacy practice.                     |
|      | Evaluate both scientific and library based information in the field of |
| c2   | oncology.  |
| D- ( | General and Transferable skills  |
| d1   | Work effectively as a member of a team.                                |
| d2   | Practice independent learning needed for continuous professional       |
| d3   | Write and present reports.   |
| d4   | Implement critical thinking and decision making skills.                |

### **D- Contents**

| Week No. | Lecture  | Practical session                               |
|----------|--|---|
|          | - Introduction: definition and common terminology of oncology                      | - Introduction to clinical oncology             |
|          | - Etiology and risk factors of cancer  | - Round for radiotherapy machines               |
| 1        |  | and to chemotherapy clinic and                  |
|          | - Oncogenesis: pathogenesis of cancer, cardinal features of                        | inpatient wards<br>- Projector slides for:      |
|          | cancer cell, metastatic cascade  | Cell cycle                                      |
| 2        | - Clinical signs and symptoms of different types of cancer                         | - Projector slides for:                         |
|          | - Basics of cancer diagnosis and staging   | Major signs of cancer                           |
| 3        |  | X- ray and CT showing tumors of different sites |
|          | - Treatment of various tumor types: surgery, radiotherapy and                      |   |
| 4        | chemotherapy   | Treatment of various tumor types                |
|          | - Epidemiology, risk factors, pathology, clinical presentation,                    | - Projector slides and case study               |
|          | prognostic factors, diagnosis, staging and treatment of breast cancer              | for:  |
| 5        |  | A patient with locally advanced                 |
|          | - Epidemiology, risk factors, pathology, clinical presentation,                    | - Projector slides and case study               |
|          | prognostic factors, diagnosis, staging and treatment of                            | for:  |
| 6        | hematopoietic malignancies (leukemia and lymphoma)                                 | A patient with AML and a patient                |
|          | - Epidemiology, risk factors, pathology, clinical presentation,                    | - Projector slides and case study               |
|          | prognostic factors, diagnosis, staging and treatment of lung cancer                | for:  |
| 7        | - Periodical exam  | A patient with locally advanced lung cancer     |
|          | - Epidemiology, risk factors, pathology, clinical presentation,                    | - Projector slides and case study               |
| 8        | prognostic factors, diagnosis, staging and treatment of GIT                        | for:  |
|          | - Epidemiology, risk factors, pathology, clinical presentation,                    | - Projector slides and case study               |
|          | prognostic factors, diagnosis, staging and treatment of                            | for:  |
| 9        | gynecologic cancer - Epidemiology, risk factors, pathology, clinical presentation, | - Projector slides and case study               |
|          | prognostic factors, diagnosis, staging and treatment of urinary tract cancer       | for:  |
| 10       | - Epidemiology, risk factors, pathology, clinical presentation,                    | - Projector slides and case study               |
| 11       | prognostic factors, diagnosis, staging and treatment of                            | for:  |
|          | - Epidemiology, risk factors, pathology, clinical presentation,                    | - Projector slides and case study               |
| 12       | prognostic factors, diagnosis, staging and treatment of                            | for:  |
|          | pediatric tumors   | A pediatric patient with ALL                    |

|    | - Complications of cancer                 | - Projector slides and case study                       |
|----|---|---|
|    | - Oncological emergencies                 | for:  |
| 13 |   | A patient with an oncological emergency (hypercalcemia) |
|    |   | - Projector slides for:                                 |
|    |   | Unit of bone marrow transplantation                     |
|    |   | - Projector slides and case study for:                  |
|    |   | A patient with an oncological                           |
| 14 | - Supportive care in cancer therapy       | - Practical exam  |
|    | - Hematopoietic stem cell transplantation |   |
| 15 | Final written exam                        |   |
|    |   |   |

### **E- Teaching and Learning Methods:**

Lectures

**Practical sessions** 

Self learning (activity, reports, internet search, group discussion...)

Case studies and problem solving

### **F- Student Assessment Methods:**

1- Written exam to assess a1, a2, a3, a4, a5, a6, c1, c2

2- Practical exam to assess b1, b2, b3, d4

3- Activities to assess c2, d1, d2, d3

4- Oral exam to assess a1, a2, a3, a4, a5, a6, c1, c2

5- Periodical exam to assess a1, a2, a3, a4, c1, c2

#### **Assessment schedule:**

| Assessment (1): Written exam    | Week 15 |
|---------------------------------|---------|
| Assessment (2): Practical exam  | Week 14 |
| Assessment (3): Activity        | Week 7  |
| Assessment (4): Oral exam       | Week 15 |
| Assessment (5): Periodical exam | Week 7  |

#### **Weighting of Assessment:**

| Assessment method           | Marks | Percentage |
|-----------------------------|-------|------------|
| Written exam                | 50    | 50%        |
| Practical exam and activity | 25    | 25%        |
| Oral exam                   | 15    | 15%        |
| Periodical exam             | 10    | 10%        |
| TOTAL                       | 100   | 100%       |

#### **G- Facilities Required for Teaching and Learning:**

Black (white) board, Data show.

#### **H- List of References:**

- **1- Course Notes:** Student book of Oncology approved by Clinical Oncology department 2018.
- Practical notes of Oncology approved by Clinical Oncology department 2012.

#### 2- Essential books:

- i- Manual of clinical oncology (sixth edition) by Casciato D.A., Lippincott Williams Wikins (2009).
- ii- Cancer management: a multidisciplinary approach (twelfth edition) (2010).

iii- American Joint Committee on cancer staging Manual (seventh

edition) Edge SB, Byrd DR, Compton CC, et al (Eds) Springer, New

York 2010.

iv- General pathology of cancer by El Bolkainy MN, Nouh MA, El

Bolkainy TN, NCI, Cairo University (third edition) (2005).

3- Recommended books:

i- De Vita, Hellman and Rosenberg's Cancer: Principles& practice of

oncology (cancer: principles& practice) De Vita (ninth edition) (2012).

ii- Physicians' cancerchemotherapy drug manual (Jones& Bartlett

learning oncology) (twelfth edition) (2011).

iii- Pocket Guide to Chemotherapy Protocols (seventh edition) (2011).

**Course Coordinators: Prof. Dr. Maher Edarous** 

## Course Specifications of Clinical Nutrition 2018-2019

\_\_\_\_\_

University: Zagazig Faculty: Pharmacy

#### **A- Course specifications:**

Program(s) on which the course is given: Bachelor of Pharmacy

(Clinical Pharmacy Program)

Major or Minor element of programs: Major

Department offering the program: ------

Department offering the course: Biochemistry department

Academic year/Level: Fifth level /ninth semester

Date of specification approval: 27/8/2018

### **B- Basic information:**

Title: Clinical Nutrition Code: PP 909

**Credit Hours:** 

Lectures : 1 h/weekPractical: 1 h/week

• Tutorials: ---

Total: 2 hrs/week

#### **C- Professional information:**

#### **1-Overall Aims of the Course:**

On completion of the course, students will be able to explain the principles of clinical nutrition, pathophysiology, diet therapy and management of different diseases.

# **2-Intended Learning Outcomes of Clinical Nutrition (ILOs):**

| A- K  | Inowledge and Understanding  |
|-------|--|
| a1    | Outline the principles of clinical nutrition and types of nutrients.   |
| a2    | Illustrate the body energetics, electrolytes, pH in health and disease state.  |
| a3    | Demonstrate the etiology and clinical features of obesity, diabetes, hypertension, cardiovascular diseases, electrolytes and acid base imbalances. |
| a4    | Discuss the principles of diet therapy and management of different diseases.   |
| a5    | Illustrate drug-food interaction and food allergies  |
| B- P  | rofessional and Practical skills   |
| b1    | Specify therapeutic and dietary interventions of obesity, diabetes, hypertension, cardiovascular diseases, electrolytes and acid base imbalances.  |
| b2    | Recommend laboratory tests for diagnosis of different diseases.  |
| b3    | Advise patients about balanced diet to promote the efficiency of medication.   |
| C- II | ntellectual skills   |
| c1    | Suggest life style modifications to prevent obesity, diabetes, hypertension, cardiovascular diseases, electrolytes and acid base imbalances.       |
| c2    | Select the appropriate drugs and dietary regimens for various disease conditions.  |
| D- 0  | General and Transferable skills  |

| Week | Lecture     | Practical session |  |
|------|-------------|-------------------|--|
| No.  | (1 h/ week) | (1 h/week)        |  |

| d1    | Develop communications skills with public, patients and other health care professionals. |
|-------|--|
|       | ·  |
| d2    | Work effectively as a member of a team.  |
| d3    | Use numeracy and computation in determination of body mass                               |
| us    | index, body weight and atherogenic index.  |
| al /1 | Practice independent learning needed for continuous professional                         |
| d4    | development.   |
| d5    | Write and present reports.   |
| d6    | Implement critical thinking and decision making skills.                                  |

### **D- Contents:**

| 1 | - Types of nutrients of balanced diet (macronutrients, micronutrients) | - Introduction to clinical nutrition    |  |  |  |  |  |
|---|--|---|--|--|--|--|--|
|   |  | - Calculation of BMR- TEE               |  |  |  |  |  |
|   | - Energy requirement and energy expenditure                            | - Obesity                               |  |  |  |  |  |
| 2 | - Diet and therapy   | - Case studies for obesity              |  |  |  |  |  |
|   | - Nutritional assessment and food pyramids                             |   |  |  |  |  |  |
|   | - Obesity (Definition, assessment, factors affecting obesity)          | - Determination of body mass index      |  |  |  |  |  |
| 3 |  | - Suggestion of life style modification |  |  |  |  |  |
|   | - Management of obesity  | - Metabolic syndrome                    |  |  |  |  |  |
| 4 | - Drugs of choice for treatment of obesity                             | - Case study                            |  |  |  |  |  |
|   |  | - Calculation of atherogenic index      |  |  |  |  |  |
|   | - Diabetes mellitus (DM)   | - Diabetes                              |  |  |  |  |  |
| 5 | -Nutrition therapy and recommendation for DM                           | - Case study                            |  |  |  |  |  |
|   | - Drug of choice for treatment of DM                                   |   |  |  |  |  |  |
|   | - Definition and types of cardiovascular diseases (CVD)                |   |  |  |  |  |  |
| 6 | - Risk factors for CVD   | - Activity (report)                     |  |  |  |  |  |
|   | - Drug of choice for treatment of CVD                                  |   |  |  |  |  |  |

|    | hypomagnesemia)  |                               |
|    | - The body and pH  | -Revision                     |
| 12 | - pH control (control of acids, control of bases)                    |                               |
|    | - Acidosis (respiratory acidosis, metabolic                          |                               |
|    | acidosis, signs, symptoms, compensation, treatment)                  |                               |
| 13 | - Alkalosis (respiratory alkalosis, metabolic                        | - Activity (report)           |
| 13 | alkalosis, signs, symptoms, compensation, treatment)                 |                               |
| 14 | - Revision& Open discussion  | - Practical exam              |
| 15 | - Final exam   |                               |

#### **E- Teaching and Learning Methods:**

- Lectures
- Practical sessions
- Case study
- Self learning (activity, reports, internet search, group discussion...)

#### **F- Student Assessment Methods:**

- 1- Written exam to assess a1, a2, a3, a4, c1, c2, d3, d6
- 2- Practical exam to assess b1, b2, b3, d1, d2, d3, d6
- 3- Activities to assess d4, d5
- 4- Oral exam to assess a1, a2, a3, a4, c1, c2, d1, d3, d4, d6
- 5- Periodical exam to assess a1, a2, c1, c2, d3, d6

#### **Assessment schedule:**

| Assessment (1): Written exam    | Week 15   |
|---------------------------------|-----------|
| Assessment (2): Practical exam  | Week 14   |
| Assessment (3): Activity        | Week 6,13 |
| Assessment (4): Oral exam       | Week 15   |
| Assessment (5): Periodical exam | Week 7    |

# Weighing of Assessment:

| Assessment method | Marks | Percentage |
|-------------------|-------|------------|
|                   |       |            |

| Written exam                  | 50  | 50%  |
|-------------------------------|-----|------|
| Practical exam and activities | 25  | 25%  |
| Oral exam                     | 15  | 15%  |
| Periodical exam               | 10  | 10%  |
| TOTAL                         | 100 | 100% |

### **G- Facilities Required for Teaching and Learning:**

• Black (white) board, Data show, laboratory equipments and chemicals.

#### **H- List of References:**

#### **1- Course Notes:**

- Student book of Clinical Nutrition approved by biochemistry department 2018-2019.
- Practical notes of Clinical Nutrition approved by biochemistry department 2018-2019.

#### 2- Essential books:

- Public health nutrition, Buttriss, Judith; Kearney, John M.;
   Lanham-New, Susan; Welch, Ailsa, 2018
- Food and Nutrition: What Everyone Needs to Know, P. K. Newby, 2018.

#### 3- Recommended books:

• Integrative Nutrition: A Whole-Life Approach to Health and Happines, Joshua Rosenthal, 2018

- Nutrition in the prevention and treatment of abdominal obesity,
   Ronald Watson, 2018
- Nutrition in Lifestyle Medicine, James M. Rippe, 2017

#### 4- Periodicals and websites:

- Egyptian J. of biochem. and molecular biology.
- British J. of nutrition
- Arab J. of Laboratory Medicine,
- J. of Cardiovascular diseases.
- www.Pubmed.Com
- www.sciencedirect.com.

# **COURSE SPECIFICATIONS**

Clinical Pharmacology
Fifth level –Semester 9
2018-2019

#### **Course specification of Clinical Pharmacology**

\_\_\_\_\_

University: Zagazig Faculty: Pharmacy

#### A- Course specifications:

Program (s) on which the course is given: Bachelor of Pharmacy (Clinical

Pharmacy)

Major or Minor element of programs: Major

Department offering the program: ------

Department offering the course: Pharmacology and Toxicology department

Academic year Level: Fifth level/ninth semester

Date of specification approval: October 2018

#### **B- Basic information:**

Title: Clinical Pharmacology Code: PO 906

Credit Hours: ---

Lectures: 2 hrs/week

Practical: 1hr/week

Tutorials: ---

Total: 3 hrs/week

#### **C- Professional information:**

#### 1-Overall aim of the course

On completion of the course, the student will be able to explain the basis of clinical pharmacology including etiology, clinical features, diagnosis and treatment of different disease as geriatrics, critical care and kidney.

# 2- Intended Learning Outcomes (ILOs)

| A- k | Knowledge and Understanding   |
|------|---|
| a1   | Illustrate etiology, epidemiology and clinical features of disorders as geriatrics, critical care and kidney. |
| a2   | Outline the lab. diagnosis of disorders as geriatrics, critical care and kidney.                              |
| a3   | Specify therapeutic regimens of disorders as geriatrics, critical care and kidney.                            |
| a4   | Underline the bases of clinical pharmacology and evidence based medicine.                                     |
| B- F | Professional and Practical skills   |
| b1   | Select the drug of choice for different diseases according to the etiology and pathophysiology.               |
| b2   | Advise patients for rational and irrational use of drugs.   |
| C- I | ntellectual skills  |
| c1   | Suggest the suitable drugs for various diseases based on pharmacological basis.                               |
| c2   | Specify drug interactions   |
| c3   | Analyze and interpret the given data for diagnosis of different disease.                                      |
| D-G  | General and Transferable skills   |
| d1   | Communicate effectively with patients and health care professional.   |

| d2 | Work as a team member.                              |
|----|---|
| d3 | Develop computer and internet communication skills. |
| d4 | Practice self-learning.                             |
| d5 | Write and present reports.                          |

#### **D- Contents:**

| Week | Lecture contents (2 hrs/lec.)        | Practical session (1hrs/lab)            |
|------|--------------------------------------|---|
| No.  |                                      |   |
| 1    | Critical care (Shock, acid base      | Case studies on shock and acid          |
|      | disturbances)                        | base disturbances                       |
| 2    | Critical care (Cardiac arrest,       | Case studies on cardiac arrest,         |
|      | pain, sedation and delirium)         | pain, sedation and delirium             |
| 3    | Critical care (stress ulcer, VTE,    |   |
| _    | Nutrition, ICH)                      | Nutrition and ICH                       |
| 4    | Geriatrics (introduction and         | Case studies on dementia                |
| _    | dementia)                            |   |
| 5    | Geriatrics (Urinary                  | Case studies on Urinary                 |
|      | incontinence, BPH)                   | incontinence and BPH                    |
| 6    | Geriatrics (Osteoarthritis and       |   |
| _    | rheumatoid arthritis)                | and rheumatoid arthritis.               |
| 7    | Nephrology (acute kidney             | -                                       |
|      | injury),                             | injury                                  |
| 0    | Midterm exam                         | Coop studios on pouto kidnou            |
| 8    | Nephrology (acute kidney             | -                                       |
| 9    | injury)                              | injury                                  |
| 9    | Nephrology (chronic kidney diseases) | Case studies on chronic kidney diseases |
| 10   | Nephrology (chronic kidney           |   |
| 10   | diseases)                            | diseases                                |
| 11   | Nephrology (drug induced             |   |
|      | kidney injury)                       | kidney injury                           |
| 12   |                                      | Case studies on complications of        |
|      | chronic kidney diseases)             | chronic kidney diseases                 |
| 13   | Revision                             | Practical exam                          |
| 14   | Revision                             |   |
| 15   | Final exam                           |   |
| 15   | FIIIai Exaiii                        |   |

# **E- Teaching and Learning Methods:**

- Lectures
- Practical sessions

- Think/pair/share
- Case study, Open discussion, self-learning

#### F- Student Assessment methods:

- 1- Written exams (midterm and final) to assess: a1 to a4 and c1 to c3.
- 2- Practical exams and lab activities to assess: b1, b2 and d1 to d5.
- 3- Oral exam to assess: a1 to a4, c1 to c3, d1 and d5.

#### **Assessment schedule**

| Assessment (1): Mid-term exam      | Week 7       |
|------------------------------------|--------------|
| Assessment (2): Lab activities     | Week 1 to 12 |
| Assessment (3): Practical exam     | Week 13      |
| Assessment (4): Final written exam | Week 15      |
| Assessment (5): Oral exam          | Week 15      |

# **Weighting of Assessment**

| Assessment method                 | Marks | Percentage |
|-----------------------------------|-------|------------|
| Mid-term exam                     | 10    | 10%        |
| Practical exam and lab activities | 25    | 25%        |
| Final written exam                | 50    | 50%        |
| Oral exam                         | 15    | 15%        |
| TOTAL                             | 100   | 100%       |

**G-** Facilities required for teaching and learning:

c. For lectures: Black (white) board, data show, air conditioned

classroom

**d.** For practical: Well-equipped labs

**H- List of References:** 

5. Course Notes: Student book of pharmacotherapy approved by the

Pharmacology and Toxicology department (2018) and practical notes

of pharmacotherapy approved by the Pharmacology and Toxicology

department (2018).

6. Essential Books:

b. American collage of clinical pharmacy updates in therapeutics

pharmacotherapy preparatory review and recertification course

(2017)

7. Recommended **Books:** Pharmacotherapy, pathophysiological

approach (tenth edition); DePero J., (2016).

**8. Periodicals and websites:** Medscape clinical guidelines updates

# **COURSE SPECIFICATIONS**

Sociology

Fifth level -Semester 9

2018-2019

## **Course Specification of Sociology**

-----

University: Zagazig Faculty: Pharmacy

#### **A- Course specifications:**

Program(s) on which the course is given: Bachelor of Pharmacy (Clinical

pharmacy)

Major or Minor element of programs: Major

Department offering the program: ------

Department offering the course: Sociology dept. Faculty of Art

Academic year/Level: Fifth level/ninth semester

Date of specification approval: September 2018

#### **B- Basic information:**

Title: Sociology Code: HU 903

**Credit Hours:** 

Lectures: 1 hr/week

Practical: -----

Tutorials: -- ---

Total: 1 hr/week

#### **C- Professional information:**

#### **1-Overall Aims of the Course:**

On completion of the course, students will be able to explain human society's relationships and social interaction.

# 2-Intended Learning Outcomes of Sociology (ILOs):

| A- K      | Knowledge and Understanding                                       |
|-----------|---|
| a1        | Illustrate principles of sociology and culture ethnicity.         |
| a2        | Describe social structure and processes.                          |
| a3        | Discuss the social changes and stability of life.                 |
| a4        | Determine communication skills within groups.                     |
| C- II     | ntellectual skills  |
| <b>c1</b> | Evaluate different forms of social relationships and competition. |
|           | Apply sociological knowledge to understand human lives and their  |
| c2        | participation in society.   |
| D- (      | General and Transferable skills                                   |
| d1        | Develop social interaction and cooperation with others.           |
| d2        | Work effectively as a member of team.                             |
| d3        | Appraise ethics of social relationships and processes.            |
| d4        | Implement critical thinking and decision- making abilities.       |

#### **D- Contents:**

| Week | Lecture  |
|------|--|
| No.  | (1 hr/ week)   |
| 1    | - What is sociology?                                   |
| 2    | - Basic concepts of sociology                          |
| 3    | - Social system and culture                            |
| 4    | - Social interaction and status                        |
| 5    | - Social Processes                                     |
| 6    | - Socialization, conflict, competition and cooperation |
| 7    | - Periodical exam                                      |
| 8    | - Culture  |
| 9    | - Personality  |
| 10   | - Social groups and classes                            |
| 11   | - Social changes                                       |
| 12   | - Social stability                                     |
| 13   | - Communication  |
| 14   | - Revision and goup discussion                         |
| 15   | - final written exam                                   |

# **E- Teaching and Learning Methods:**

Lectures

Self learning (group discussion...)

### **F- Student Assessment Methods:**

1- Written exam to assess a1, a2, a3, a4, c1, c2, d1, d2, d3, d4

2- Periodical exam to assess a1, a2, a3, c1, c2, d1, d2, d3, d4

### **Assessment schedule:**

| Assessment (1): Written exam    | Week 15 |
|---------------------------------|---------|
| Assessment (2): Periodical exam | Week 7  |

#### **Weighting of Assessment:**

| Assessment method | Marks | Percentage |
|-------------------|-------|------------|
| Written exam      | 90    | 90%        |
| Periodical exam   | 10    | 10%        |
| TOTAL             | 100   | 100%       |

#### **G- Facilities Required for Teaching and Learning:**

Black (white) board, Data show.

#### **H- List of References:**

## 1-Overall aim of the course

## On completion of the course, the student will be able to:

- Describe guidelines of manufacturing of different dosage forms
- Determine good practices that should be followed during sampling, packaging, storing and labeling of different dosage forms

## **2-Intended Learning Outcomes**

| ILOs   |
|--|
| A- Knowledge and Understanding:  |
| a1: Outline the history of GMP development within years  |
| a2: Enumerate the minimum requirements for GMP   |
| a3: Outline the guidelines for proper sampling, packaging, labeling and storage of pharmaceutical products a4: Recognize the importance of qualification and validation of products during manufacturing process |
| B- Professional and Practical skills:  |
| b1: Identify the required documentation during manufacturing process   |
| b2: Demonstrate the good practices regarding cleaning of equipment and accessories and personal hygiene  |
| C- Intellectual skills:  |
| c1: Judge the good and bad manufacturing processes   |
| D-General and Transferable skills:   |
| d1: Develop critical thinking skills   |
|  |

## **D- Contents**

| Week<br>No. | Lecture contents  | Practical session   |
|-------------|---|---|
| 1           | Introduction of pharmaceutical industry and GMP                 |   |
| 2           | History of GMP development within years                         | Introduction of various definitions and abbreviations concerning GMP  |
| 3           | Therapeutic good regulators                                     | Demonstration of receiving raw, printed and packaging materials   |
| 4           | Safety and quality regulations of therapeutic good regulators   | Description of batch documents and batch documentation checklist  |
| 5           | Guidelines of GMP towards premises and production areas         | Control of air flow in production areas with diagrams   |
| 6           | Airlocks and air cleanliness levels                             | Identification of contents of batch manufacturing records   |
| 7           | Periodical exam   | Periodical exam   |
| 8           | Types, causes and prevention of products contamination          | Representations and evaluation of batch manufacturing records   |
| 9           | Documentation   | Videos about different cleaning of equipment and accessories sheets   |
| 10          | Steps of production process and following processing operations | Display sheets of standard operating procedure on personal hygiene  |
| 11          | Proper control of packaging                                     | Discussion about contents of sheets of standard operating procedure on cleaning of equipment and accessories and personal hygiene |
| 12          | Qualification and validation of production process              | Practical exam  |
| 13          | Personal training and hygiene                                   |   |

| 14 | Complaints, Recalls and Product quality review |  |
|----|--|--|
| 15 | Final written exam                             |  |

## **E- Assessment schedule:**

| Assessment task                 | Week due |
|---------------------------------|----------|
| Assessment (1): Written exam    | Week 15  |
| Assessment (2): Practical exam  | Week 12  |
| Assessment (3): Periodical exam | Week 7   |
| Assessment (4): Oral exam       | Week 15  |

# F- Weighting of assessment:

| Assessment task                 | Marks | Proportion of total assessment |
|---------------------------------|-------|--------------------------------|
| Assessment (1): Written exam    | 50    | 50%                            |
| Assessment (2): Periodical exam | 10    | 10%                            |
| Assessment (3): Practical exam  | 25    | 25%                            |
| Assessment (4): Oral exam       | 15    | 15%                            |
| Total                           | 100   | 100%                           |

#### **G-Teaching and Learning Methods:**

- Lectures
- Practical session
- Demonstrative videos

#### H- Student Assessment methods:

- 1- Written exams to assess: a1, a2, a3, a4, b1, b2, c1, and d1
- 2- Practical exams to assess: a1, a2, a3, a4, b1, b2, c1, and d1

#### I- Facilities required for teaching and learning:

- 1- For lectures: boards, data show
- 2- For labs: data show
