COURSE SPECIFICATIONS

Community Pharmacy

Fifth year – first Term
2019-2020

Course specification of Community pharmacy

University: Zagazig **Faculty: Pharmacy**

A- Course specifications:

Program (s) on which the course is given: Bachelor of Pharmacy

Major or Minor element of programs: Major

Department offering the program: -------

Department offering the course: Pharmacy Practice Department

Academic year Level: Fifth year/First semester

Date of specification approval: September 2019

B- Basic information:

Title: Community pharmacy Code: PP511

Credit Hours: ---

Lectures: 2 hrs/week

Practical: 1hr/week

Tutorials: ---

Total: 2.5 hrs/week

C- Professional information:

1-Overall aim of the course

On completion of the course, the student will be able to identify good communication strategies between pharmacist and patient, educate different classes of patients and respond to patient's requests in different situations. Students will be able to identify higher risk of a serious condition and consider when referring the patient to the doctor. The student will be able to manage common disorders of women health, childhood conditions, respiratory, nervous, gastrointestinal and dermatological systems as well.

2- Intended Learning Outcomes of Community pharmacy:

A- Knowledge and Understanding	
a1	Describe appropriate keys for good communication with patients
a2	Illustrate the etiology, epidemiology of different diseases related to women health, childhood conditions, respiratory, nervous, gastrointestinal and dermatological systems
a3	State drugs which can treat the aforementioned diseases, adverse reactions, contraindications and drug-drug interactions
B- Professional and Practical skills	
b1	Evaluate the pharmacist behavior in different communication scenarios
b2	Select proper medicines according to the disease and the patient state
C- Intellectual skills	
c1	Identify different barriers that hinder effective patient – pharmacist communication
c2	Solve different cases related to OTC drugs used for treatment of women health, childhood conditions as well as respiratory, nervous, gastrointestinal and dermatological disorders
D- General and Transferable skills	
d1	Interact effectively with patients, the public and health care professional orally and written
d2	Work effectively as a member of a team
d3	Use information technology to collect and present data

D- Contents:

Week No.	Lecture contents (2 hrs/week)	Practical session (1 hr/week)
1	Course orientation Strategies for Communicating Effectively with Patients	Patient education
2	Women health	Women health cases
3	Childhood conditions	Childhood conditions, case study
4	Respiratory system disorders	visit to faculty educational pharmacy & report writing
5	Respiratory system disorders	Respiratory system disorders (Case study)
6	Central nervous system disorders	Central nervous system disorders (Case study)
7	Midterm exam	
8	Gastroenterology	GIT disorders (Case study)
9	Gastroenterology	
10	Common Dermatologic Diseases and Conditions	Dermatological disorders (case study)
11	Ear conditions	Ear disorders (case study)
12	Eye conditions	Eye disorders (case study)
13	Role play/presentation	
14	- Revision	**Practical exam**
15	- final exam	

E- Teaching and Learning Methods:

- Lectures
- Practical session (case study, role play)
- Field visit: faculty educational pharmacy in addition to any community pharmacy to fill the required survey (survey pharmacists in community pharmacies about challenges they faced that hinder good communication)

F- Student Assessment methods:

1-Written exams to assess: a1, a2, a3, c1, c2

2- Activity (Students will be asked to survey pharmacists in community pharmacies about challenges they faced that hinder good communication, then present their results as a presentation/play) to assess: d1, d2, d3

3-Practical exam (solving cases) to assess: b2, c2

4-Oral exam to assess: a1, a2, a3, b1, c1

Assessment schedule

Assessment (1): Midterm exam	Week 7
Assessment (2): Final Written exam	Week 15
Assessment (3): Role play/presentation	Week 13
Assessment (4): Practical exam	Week 14
Assessment (5): Oral exam	Week 15

Weighting of Assessment

Assessment method	Marks	Percentage
Midterm exam	10	10%
Final Written exam	50	50%
Role play/presentation	5	5%
Practical exam (cases)	20	20%
Oral exam	15	15%

TOTAL	100	100%

G- Facilities required for teaching and learning:

- For lectures : Black (white) boards, data show, air conditioned classroom
- For practical: labratories
- Faculty educational pharmacy & Community pharmacy

H- List of References:

1- Course Notes: Student book of Hospital pharmacy and clinical pharmacy -2 approved by pharmacy practice department (2019)

COURSE SPECIFICATIONS

Industrial Pharmacy 1

Fifth year – first Term
2019-2020

Course specification of Industrial Pharmacy-1

University: Zagazig Faculty: Pharmacy

A- Course specifications:

Program (s) on which the course is given: Bachelor of Pharmacy.

Major or Minor element of programs: Major

Department offering the program: -------

Department offering the course: Pharmaceutics department

Academic year Level: Fifth year/First term

Date of specification approval: September 2019

B- Basic information:

Title: Industrial pharmacy-1 Code: PC 516

Credit Hours: ---

Lectures: 2 hrs/week

Practical: 1hr/week

Tutorials: ---

Total: 2.5 hrs/week

C- Professional information:

1-Overall aim of the course

On completion of the course, the student will be able to:

- Explain the principles and mechanisms of equipment used for different pharmaceutical processes including filtration, evaporation, drying extraction, evaporation, crystallization and heat transfer.

2- Intended Learning Outcomes of Industrial pharmacy-1 (ILOs)

A- Knowledge and Understanding	
a1	Outline the principles and mechanisms of different pharmaceutical processes including: evaporation, drying, filtration, extraction, filtration, etc….
a2	Enumerate the apparatus used in evaporation, drying, filtration, extraction, filtration, etc….
a3	Illustrate the structure of different apparatus used in evaporation, drying, filtration, extraction, filtration, etc….
a4	Explain the technique of different apparatus used in evaporation, drying, filtration, extraction, filtration, etc….
B- Professional and Practical skills	
b1	Solve different problems related to heat transfer, evaporation and extraction
b2	Interpret the results of humidity charts.
b3	Demonstrate different apparatus used in evaporation, drying, filtration, extraction, filtration, etc….
C- Intellectual skills	
c1	Differentiate between different techniques and apparatus used for different pharmaceutical processes
c2	Suggest appropriate apparatus for different pharmaceutical processes
c3	Identify advantages and disadvantages of apparatus used in evaporation, drying, filtration, extraction, centrifugation, etc….
D- General and Transferable skills	
d1	Demonstrate critical thinking, decision making and problem solving abilities

D- Contents:		
Week No.	**Lecture contents (2 hrs/week)**	**Practical session (1 hr/week)**
1	- Evaporation	- Problems on evaporation
2	- Evaporation	- Evaporation apparatus drawings
3	- Drying	- Problems on drying
4	- Drying	- Drying apparatus drawings
5	- Heat transfer	- Humidity chart
6	- Refrigeration	- Problems on heat transfer
7	Midterm exam	
8	- Crystallization	- Heat transfer apparatus drawings
9	- Mixing	- Refrigeration and crystallization apparatus drawings
10	- Filtration	- Mixing & filtration apparatus drawings
11	- Air purification	- Air purification apparatus drawings
12	- Centrifugation	- Centrifugation apparatus drawings
13	- Extraction	**- Practical exam**
14	- Extraction	
15	**Final written exam**	

E- Teaching and Learning Methods:

- Lectures
- Practical session
- Demonstrative videos followed by group discussion.

F- Student Assessment methods:

1-Written exam to assess: a1, a2, a3, a4, c1, c2, c3

2-Practical exam to assess: b1, b2, b3, c1, c2

3-Oral exam to assess: a1, a2, a3, a4, c1, c2, c3

4- Students activity during labs d1

Assessment schedule

Assessment (1): midterm exam	Week 7
Assessment (2): activity	Each lab
Assessment (3): final Written exam	Week 15
Assessment (4): Practical exam	Week 13
Assessment (5): Oral exam	Week 15

Weighting of Assessment

Assessment method	Marks	Percentage
Midterm exam	10	10%
Activity	5	5%
Final Written exam	50	50%
Practical exam	20	20%
Oral exam	15	15%
TOTAL	100	100%

COURSE SPECIFICATIONS

Applied Pharmacognosy

Fifth year – first Term
2019-2020

Course Specification of Applied Pharmacognosy

University: **Zagazig** Faculty: **Pharmacy**

A- Course specifications:

Program(s) on which the course is given: Bachelor of Pharmacy

Major or Minor element of programs: Major

Academic year/Level: Fifth year /First term

Date of specification approval: 30-9-2019

B- Basic information:

Title: Applied Pharmacognosy Code: PG 517

Credit Hours: ---

Lectures: 2 hrs/week

Practical: 2 hrs/week

Tutorials: ---

Total: 3 hrs/week

C- Professional information:

1-Overall Aims of the Course is to describe the following:

- Drug discovery from natural sources.
- Quality control of herbal preparation.
- Spectroscopic determination of pure compounds.
- Chromatographic application to perform qualitative and quantitative analysis of natural products.
- At the end of the course, the student able to apply the most suitable technique of quality control according to the nature of the preparation and constituents.

2-Intended Learning Outcomes of Applied Pharmacognosy

A- Knowledge and Understanding	
a1	Outline the principles of production, drug discovery, evaluation of natural products (crude drugs and isolates) by organoleptic characters, macroscopical, microscopical, chromatographic, ...etc.… etc
a2	Recognize the basics of spectroscopic evaluation of natural products including UV, IR, NMR and Mass spectroscopy.
a3	Describe and write different analytical techniques for identification of pure isolates including UV, IR, NMR and Mass spectroscopy.
a4	Outline different chromatographic techniques for analysis and evaluation especially GC and HPLC
a5	Outline GLP guidelines and validation procedures in crude drugs and pure isolates evaluation
B- Professional and Practical skills	
b1	Examine purity of crude drugs and detection of adulterants
b2	Examine the active constituents by using different tools e.g. melting point, optical activity, spectrophotometery…etc
b3	Illustrate active substances using different spectroscopic and chromatographic method
C- Intellectual skills	
c1	Adopt GLP guidelines in quality control of natural products using different evaluation and spectroscopic methods.
c2	Analyse crude drugs qualitatively and quantitatively using chromatographic techniques and chemical screening.
c3	Recognize appropriate methods for standardization of active substances using analytical, structural and physical standards.
D- General and Transferable skills	
d1	Retrieve information from different natural product sources.
d2	Operate effectively as a member of a team**.**
d3	Write reports and present it.
d4	Demonstrate decision making and problem solving skills

D- Contents:

Week No.	Lecture (2hrs/week)	Practical session (2hrs/week)
1	-Production of natural drugs	-Introduction of quality control of crude drugs (physical characters, analytical evaluation, biological screening .. etc **Activity 1**: Model for drug profile.
2-3	-Drug discovery from different natural sources.	-Checking the purity of herbal drugs using microscopical examination.
4	-Evaluation of natural products -Detection of adulteration -Sampling of drugs	- Checking the purity of crude herbal drugs (extracts) using TLC profiling against reference. **Activity 2**: Quality control of commercially available pharmaceutical products.
5	-Standardization of natural drugs	- Checking the purity of crude herbal drugs (extracts) using TLC profiling against reference
6	-Physical data of isolates -Isolation of crude drugs - Analytical standards	Group discussion for the required activity.
7	**Midterm exam**	
8	-Spectroscopic evaluation of natural products -Micro elemental analysis -UV Spectroscopy	-UV Spectroscopic problems
9	-IR Spectroscopy - -Mass Spectroscopy	-IR Spectroscopic problems -Mass Spectroscopy problems
10	-^{1}HNMR Spectroscopy	-^{1}HMNR Spectroscopic problems -^{13}CMNR Spectroscopic problems **Activity 3:** general spectroscopy problems including identification of small molecules
11	- ^{13}CNMR Spectroscopy	Application of chromatography (GC and HPLC), central lab. visit.
12	-Chromatography -Applications of GC	**Final Practical exam**
13	- Applications of HPLC and some other chromatographic techniques in drug evaluation -Validation	**Final Practical exam**
14	Revision	
15	**Final written exam.**	

Activity 1: Each student submits a model for drug profile containing the plant organ, active constituents, assay and pharmacological uses with drawing its diagnostic key elements on time.

Activity 2: Group of 4 students select one of commercially available pharmaceutical products e.g herbal tea bag, syrup, soft gelatine capsule or hard gelatin capsule…etc. Each group should apply the quality control parameters for standardization of the chosen pharmaceutical products according to the schedule lab.

Activity 3: Each student should handle different spectra (UV, IR, Mass, NMR) and interperetate its data for structures elucidation of the given compound from natural sources (flavonoids, organic acids…etc).

E- Teaching and Learning Methods:

- Interactive lectures
- Practical sessions
- Self-learning (group discussion)
- Net research.
- Central lab. visit.

F- Student Assessment Methods:

1- Written exam (midterm, final) to assess: a1-5, c1-3.
2- Activity to assess: d1-4.
3- Practical exam to assess: b1-3, d1-4.
4- Oral exam to assess: a1-5, c1-3, d4.

Assessment schedule:

Assessment (1): Midterm exam	Week 7
Assessment (2): Activity	Week 1, 4, 6, 10
Assessment (3): Practical exam	Week 12, 13
Assessment (4): Final written exam	Week 15
Assessment (5): Oral exams	Week 15

Weighting of Assessment:

Assessment method	Marks	Percentage
Midterm exam	10	10%
Activity	5	5%
Practical exam	20	20%
Final written exam	50	50%
Oral exam	15	15%
TOTAL	100	100%

G- Facilities Required for Teaching and Learning:

- Lectures: Black (white) board, Data show.

- Laboratory equipment: Chemicals, glassware, microscopes, precoated TLC, digital balances, water bathes, oven.

COURSE SPECIFICATIONS

Clinical Pharmacology

Fifth year – first Term
2019-2020

Course specification of Clinical Pharmacology

University: Zagazig Faculty: Pharmacy

A- Course specifications:

Program (s) on which the course is given: **Bachelor of pharmacy**

Major or Minor element of programs: Major

Department offering the program: -------

Department offering the course: Pharmacology and toxicology department

Academic year Level: **Fifth year/First semester**

Date of specification approval: October 2019

B- Basic information:

Title: Pharmacology and toxicology department **Code: PT518**

Credit Hours: ---

Lectures: 3hrs/week

Practical: 2hrs/week

Tutorials: ---

Total: 4 hrs/week

C- Professional information:

1-Overall aim of the course

On completion of the course, the student will be able to:

- Demonstrate a thorough knowledge etiology and epidemiology and clinical features of many organ disorders.
- Demonstrate an ability to construct appropriate management strategies (both diagnostic and therapeutic) for patients with common conditions, and to recognize and outline an initial course of management for patients with serious conditions requiring critical care.
- Use the proper pharmaceutical and medical terms, abbreviations and symbols in pharmacy practice.
- Develop critical thinking, problem solving and decision making skills.

2- Intended Learning Outcomes of Clinical Pharmacology (ILOs)

A- Knowledge and Understanding	
a1	Explain the bases of clinical pharmacology and evidence based medicine.
a2	Illustrate etiology, epidemiology and clinical features of many organ disorders.
a3	Outline the laboratory Diagnosis of different disease.
a4	Specify therapeutic regimens of different disease.
B- Professional and Practical skills	
b1	Use the proper pharmaceutical and medical terms, abbreviations and symbols in pharmacy practice.
b2	Assess the different signs and symptoms of a certain disease state
b3	Select the suitable drug in various disease conditions based on knowledge of disease, drug-drug interaction and adverse drug reactions.
C- Intellectual skills	
c1	Integrate knowledge of pharmacology and therapeutics to use drugs in various disease states.
c2	Choose the appropriate drug for the appropriate case.
D-General and Transferable skills	
d1	Work coherently and successfully as a part of a team in assignments
d2	Implement presentation skills
d3	Develop critical thinking, problem solving and decision making skills.

D- Contents:

Week No.	Lecture contents (3 hrs/lec.)	Practical session (2hrs/lab)
1	Liver disorders (1)	• Case Studies of liver disease • Treatment guidelines for diabetes (activity)
2	Liver disorders (2)	• Case Studies of liver disease • Treatment guidelines for gynecological disorders (activity)
3	Liver disorders (3)	• Case Studies of liver disease
4	Critical care(1)	• Case Studies of liver disease
5	Critical care (2)	• Case Studies in Critical care • Treatment guidelines for cardiovascular disorders (activity)
6	Critical care (3)	• Case Studies in Critical care • Treatment guidelines for respiratory disorders (activity)
7	Midterm exam	
8	Acute kidney injury Chronic kidney disease	• Case Studies in Critical care
9	Renal replacement therapy	• Case study of acute kidney disease • Treatment guidelines for hypovolemic shock (activity)
10	Complications of CKD (1)	• Case study of acute kidney disease • Treatment guidelines for lactic acidosis (activity)
11	Complications of CKD (2)	• Case study of chronic kidney disease
12	Drug induced nephropathy (1)	• Case study of chronic kidney disease
13	Drug induced nephropathy (2)	• **Practical exam**
14	Revision	
15	**Final exam**	

E- Teaching and Learning Methods:

- Lectures
- Practical sessions
- Think/pair/share (information collection from different sources)
- Case study

F- Student Assessment methods:

1- Written exams to assess: a1, a2, a3, a4, b1, c1,c2
2- Practical exams to assess: b1,b2, b3, c1,c2, d1, d2
3- Oral exam to assess: a1, a2, a3, a4, b1, c1,c2, d3

Assessment schedule

Assessment(1): Midterm exam	**Week 7**
Assessment(2): Activity	**Week 1,2,5,6,9,10**
Assessment(3) :Practical exam	**Week 13**
Assessment(4) :Oral exam	**Week 15**
Assessment(5) :Final Written exam	**Week 15**

Weighting of Assessment

Assessment method	Marks	Percentage
Midterm exam	15	10 %
Activity	10	7%
Practical exams	30	20%
Oral exam	20	13%
Written exam	75	50%
TOTAL	150	100%

G- Facilities required for teaching and learning:

• For lectures: Black (white) boards, data show, air conditioned classroom

• For practical: Well-equipped labs with data show facilities

COURSE SPECIFICATIONS

Pharmacotherapy

Fifth year – first Term
2019-2020

Course specification of Pharmacotherapy

University: Zagazig **Faculty: Pharmacy**

A- Course specifications:

Program (s) on which the course is given: Bachelor of Pharmacy.

Major or Minor element of programs: Major

Department offering the program: -------

Department offering the course: Pharmacology and Toxicology

Academic year Level: **Fifth year – 1st term**

Date of specification approval: October 2019

B- Basic information:

Title: Pharmacotherapy **Code : PT 519**

Credit Hours: ---

Lectures: 2 hrs/week

Practical: 2hr/week

Tutorials: ---

Total: 3 hrs/week

C- Professional information:

1- Overall aim of the course

On completion of the course, the student will be able to explain the basis of pharmacotherapy including etiology, clinical features, diagnosis and treatment of different disease as oncology supportive care, geriatrics, pediatric and CNS disorders.

2- Intended Learning Outcomes (ILOs)

A- Knowledge and Understanding	
a1	Illustrate etiology, epidemiology and clinical features of disorders as oncology supportive care, geriatrics, pediatric and CNS disorders.
a2	Outline the lab. diagnosis of disorders as oncology supportive care, geriatrics, pediatric and CNS disorders.
a3	Specify therapeutic regimens of disorders as oncology supportive care, geriatrics, pediatric and CNS disorders.
a4	Underline the bases of Pharmacotherapy, clinical pharmacology and evidence based medicine.
B- Professional and Practical skills	
b1	Select the drug of choice for different diseases according to the etiology and pathophysiology.
b2	Advise patients for rational and irrational use of drugs.
C- Intellectual skills	
c1	Suggest the suitable drugs for various diseases based on pharmacological basis.
c2	Specify drug interactions
c3	Analyze and interpret the given data for diagnosis of different disease.
D-General and Transferable skills	
d1	Communicate effectively with patients and health care professional.
d2	Work as a team member.
d3	Develop computer and internet communication skills.
d4	Practice self-learning.
d5	Write and present reports.

D- Contents:

Week No.	Lecture contents (2 hrs/lec.)	Practical session (2hrs/lab)
1	Oncology supportive care (CINV)	Case studies on CINV
2	Oncology supportive care (Pain management)	Case studies on pain management in cancer patients
3	Oncology supportive care (Febrile neutropenia, thrombocytopenia)	Case studies on febrile neutropenia and thrombocytopenia in cancer patient
4	Oncology supportive care (anemia and fatigue, oncologic emergencies)	Case studies on anemia and fatigue and oncologic emergencies
5	Oncology supportive care (chemoprotectants and extravasation), Geriatrics (introduction)	Case studies on chemoprotectants and extravasation, Geriatrics (introduction)
6	Geriatrics (dementia, UI, BPH)	Case studies on dementia, UI and BPH.
7	**Midterm exam**	
8	Geriatrics (osteoarthritis)	Case studies on osteoarthritis
9	Geriatrics (rheumatoid arthritis)	Case studies on rheumatoid arthritis
10	Pediatrics (ADHD)	Case studies on ADHD
11	Neurological disorders (Multiple sclerosis)	Case studies on Multiple sclerosis
12	Neurological disorders (Multiple sclerosis)	Case studies on Multiple sclerosis and schizophrenia
13	Psychiatric disorders (schizophrenia)	**Practical exam**
14	Revision	
15	Final exam	

E- Teaching and Learning Methods:

- Lectures
- Practical sessions
- Think/pair/share

- Case study, Open discussion, self-learning

F- Student Assessment methods:

1- Written exams (midterm and final) to assess: a1 to a4 and c1 to c3.

2- Activity (group assignment) to assess d1 to d5.

3- Practical exam to assess: b1 and b2.

4- Oral exam to assess: a1 to a4, c1 to c3, d1 and d5.

Assessment schedule

Assessment (1): Mid-term exam	**Week 7**
Assessment (2): Activity	**Week 1 to 12**
Assessment (3): Practical exam	**Week 13**
Assessment (4): Final written exam	**Week 15**
Assessment (5): Oral exam	**Week 15**

Weighting of Assessment

Assessment method	Marks	Percentage
Mid-term exam	10	10%
Activity	5	5%
Practical exam	20	20%
Final written exam	50	50%
Oral exam	15	15%
TOTAL	100	100%

G- Facilities required for teaching and learning:

a. For lectures : Black (white) board, data show, air conditioned classroom

b. For practical: Well-equipped labs

COURSE SPECIFICATIONS

Public Health

Fifth year – first Term
2019-2020

Course specification of Public Health

University: Zagazig Faculty: Pharmacy

A- Course specifications:

Program (s) on which the course is given: Bachelor of Pharmacy

Major or Minor element of programs: Major

Department offering the program: -------

Department offering the course: Microbiology and Immunology

Academic year Level: fifth year students

Date of specification approval: September 2019

B- Basic information:

Title: Public health Code: **MI515**

Lectures: 1 hrs/week

Practical: 1 hrs/week

Total: 1.5 hrs/week

C- Professional information:

1-Overall aim of the course

On completion of the course, the student will be able to: Illustrate the basic concepts of public health including general topics in Epidemiology and control of infectious diseases (definitions, prevention and control of infectious diseases), Environmental health (air pollution, water pollution, food sanitation, proper residential environment, refuse and sewage disposal, occupational diseases and industrial health), Nutrition, Malnutrition, Overpopulation, Family planning and bioterrorism

2- Intended Learning Outcomes of Public health (ILOs)

A- Knowledge and Understanding	
a1	**Recognize** the basic concepts of public health including epidemiology and List the different types of epidemiology studies and give an example of a study design used for each type
a2	Describe methods of environmental sanitation and control (such as water and food supplies, waste disposal, food handling, and housing).
a3	Illustrate the major topics associated with bioterrorism and nosocomial infections
a4	Illustrate strategies of healthy nutrition, family planning, and also other strategies related to maternal and child health care programs
B- Professional and Practical skills	
b1	**Interpret** data of microbiological analysis of water, food and milk
b2	**Solve** different cases related to (nutrition problem ,nutritional need of individuals, nosocomial infections, family planning and bioterrorism).
b3	**Calculate relative risk, and/or odds ratio.**
b4	**Examine** data from case-control or cohort studies and bioterrorism
C- Intellectual skills	
c1	Identify different causes of diseases and environmental risk situation
c2	Suggest different strategies for disease prevention
c3	Analyze epidemiologic data about disease in a population, changes in human morbidity and mortality over time based on calculation of prevalence rate, incidence rate, relative risk, and/or odds ratio
D-General and Transferable skills	
d1	Communicate effectively both in oral and written manners
d2	Acquire online search skills through writing reports and researches
d3	Develop critical thinking and problem solving skills .

D- Contents:

Week No.	Lecture contents (1 hrs/week)	Practical session (1hrs/week)
1	Introduction to public health and epidemiology	Lab rules
2	Environmental health: **Air** pollution introduction to **Water** supply & sanitation	Bacteriological examination of **water** (demonstration through data show)
3	Environmental health: ○ Disease transmitted by water ○ Controlling waterborne disease ○ Purification of water ○ Standard of safe water supply ○ **Student Activity (report)**	Bacteriological examination of **water** (demonstration through data show)
4	○ Food sanitation ○ Milk sanitation & Milk- borne disease ○ Food poisoning (Food-borne illness) ○ General measures for safe food	Bacteriological examination of **Milk** (demonstration through data show)
5	Refuse, sewage and Wastes disposal • Hazards of improper Wastes disposal • Sewage treatment Occupational diseases and industrial health	**Food** poisoning (case study)
6	Nutrition, malnutrition and nutritional deficiency diseases	**Nutrition** (case study)
7	**Midterm exam**	**Midterm exam**
8	○ Terms used for various forms of outbreaks ○ Classification of infectious diseases ○ Epidemiological Model	Study design (calculate prevalence , incidence rate)
9	Specific measurements: I. Morbidity rates II. Mortality rates • Problem solving	Nosocomial infections (case study)
10	Study Designs in Epidemiology Epidemiological study methods: - Descriptive & Analytical studies: 1. Cohort studies	Family planning (case study)

	2. Case-control studies	
11	○ Nosocomial infections ○ Bioterrorism	Bioterrorism (case study)
12	○ Immunization and vaccination programs	**Final Practical Exam**
13	○ Family planning & Overpopulation ○ child and mother care programs ○ Activity (report)	
14	○ Revision	
15	○ Written exam	

E- Teaching and Learning Methods:

- Lectures
- Practical sessions
- Case study
- Report writing

F- Student Assessment methods:

1- Written exams to assess: a1, a2, a3, a4, c1, c2, c3

2- written report to assess: b1, d2

3- Practical exams to assess: b1, b2, b3, b4, d3

4- Oral exam to assess: a1, a2, a3, a4, c1, c2, c3, d1,d3

Assessment schedule

Assessment (1): Final written exam	Week 15
Assessment (2): Practical exams	Week 12
Assessment (3): Oral exams	Week 15

Weighting of Assessment

Assessment method	Marks	Percentage
Final written exam (including self learning questions)	30	60%
Practical practice & exam	10	20%
Oral exam	10	20%

TOTAL	50	100%

G- Facilities required for teaching and learning:

- For lectures : Black (white) boards, data show, classroom
- For practical: labs equipped with data-show

H- List of References:

1- Course Notes: Student book of:- public health approved by :-

Microbiology and Immunology department

2- Essential Books:

1) Pharmacy in Public Health: Basics and Beyond. *By Jean Carter and Marion Slack*, 2010.
2) **Foodborne disease outbreaks: Guidelines for investigation and control**. **Publisher**: World Health Organization, 2008.
3) **Global Burden of Disease and Risk Factors** by **Alan D. Lopez, Colin D. Mathers, Majid Ezzati - World Bank Publications , 2006.**

3- **Recommended Periodicals and websites:**

decision-making abilities.										

COURSE SPECIFICATIONS

Good manufacturing practice (GMP)

Fifth Year- Elective Courses
2019-2020

Course specification of Good Manufacturing Practice (GMP)

University: Zagazig Faculty: Pharmacy

A- Course specifications:

- Program (s) on which the course is given :Bachelor of pharmacy
- Major or minor element of programs : Major
- Department offering the course : Pharmaceutics
- Academic year level :Fifth year (Elective course: Good Manufacturing Practice (GMP))
- Date of specification approval : October 2019

B- Basic information:

- Title : Good Manufacturing Practice (GMP)
- Credit Hours : --- Code : PC528
- Lectures : 2 hr/ week
- Practical : 2 hr / week
- Tutorials : ---------
- Total : 3 hr/week

C- Professional information:

1-Overall aim of the course

On completion of the course, the student will be able to:

- Describe the guidelines of manufacturing of dosage forms
- Determine the good practices that should be followed during sampling, packaging, storing and labeling of different dosage forms

2-Intended Learning Outcomes

ILOs

A- Knowledge and Understanding:

a1: Outline the history of GMP development within years

a2: Enumerate the minimum requirements for GMP

a3: Outline the guidelines for proper sampling, packaging, labeling and storage of pharmaceutical products

a4: Recognize the importance of qualification and validation of products during manufacturing process

B- Professional and Practical skills:

b1: Identify the required documentation during manufacturing process

b2: Demonstrate the good practices regarding cleaning of equipment and accessories and personal hygiene

C- Intellectual skills:

c1: Judge the good and bad manufacturing processes

D-General and Transferable skills:

d1: Develop critical thinking skills

D- Contents

Week No.	Lecture contents	Practical session
1	Introduction of pharmaceutical industry and GMP	--
2	History of GMP development within years	Introduction of various definitions and abbreviations concerning GMP
3	Therapeutic good regulators	Demonstration of receiving raw, printed and packaging materials
4	Safety and quality regulations of therapeutic good regulators	Description of batch documents and batch documentation checklist
5	Guidelines of GMP towards premises and production areas	Control of air flow in production areas with diagrams
6	Airlocks and air cleanliness levels	Identification of contents of batch manufacturing records Representations and evaluation of batch manufacturing records
7	Midterm exam	
8	Steps of production process Types, causes and prevention of products contamination	Videos about different cleaning of equipment and accessories sheets
9	Documentation	Display sheets of standard operating procedure on personal hygiene
10	Processing operations during production process	Discussion about contents of sheets of standard operating procedure on cleaning of equipment and accessories and personal hygiene
11	Proper control of packaging	Final revision about practical course contents
12	Qualification and validation of production process	Practical exam
13	Personal training and hygiene	--
14	Complaints, Recalls and Product quality review	--
15	Final written exam	--

E-Teaching and learning methods:

- Lectures
- Practical
- Demonstrative videos

F- Assessment schedule:

Assessment task	Week due
Assessment (1): Midterm exam	Week 7
Assessment (2): Student Activity	Each lab
Assessment (3): oral exam	Week 15
Assessment (4): Final Written exam	Week 15
Assessment (5): Practical exam	Week 12

Weighting of assessment:

Assessment task	Marks	Proportion of total assessment
Assessment (1): Midterm exam	10	10%
Assessment (2): Student Activity	5	5%
Assessment (3): oral exam	15	15%
Assessment (4): Final Written exam	50	50%
Assessment (5): Practical exam	20	20%
Total	100	100%

G-Students assessment:

Written exams to assess: a1, a2, a3, a4, b1, b2, c1, and d1

Practical exams & activity to assess: a1, a2, a3, a4, b1, b2, c1, and d1

Oral exam to assess: a1, a2, a3, a4, b1, b2, c1, and d1

H- Facilities required for teaching and learning:

1- For lectures: boards, and data show

2- For labs: data show
