The plant immune system

JDG Jones, JL Dangl - nature, 2006 - nature.com

Many plant-associated microbes are pathogens that impair plant growth and reproduction.

Plants respond to infection using a complex system that recognizes and responds to the pathogen.

☆ 99 Cited by 8923 Related articles

Adhesion receptors of the immune system

TA Springer - Nature, 1990 - nature.com

The adhesive interactions of cells with their environment are essential for all developmental processes.

The immune system is a complex system that recognizes and responds to the pathogen.

A complex network of specialized cells, tissues, and organs that recognize and defend the body from foreign substances, primarily disease-causing microorganisms such as bacteria, viruses, parasites, and fungi. Organs and tissues of the immune system include the bone marrow, spleen, thymus, tonsils, mucous membranes, and skin. Granulocytes, macrophages, and T lymphocytes are examples of specialized cells. The lymphatic vessels of the immune system carry immune cells, which converge in lymph nodes found throughout the body. A swollen lymph node often indicates an active immune response to a foreign substance. HIV infection gradually destroys the immune system.

Diet reversal and immune modulation show key role for liver and adipose tissue T cells in murine non-alcoholic steatohepatitis.

Van Herck MA¹, Vonghia L², Kwanten WJ³, Julé Y⁴, Vanwolleghem T³, Ebo D⁵, Michielsens PP³, De Man J⁶, Gama L⁷, De Winter BY⁶, Francque SM³.

⊕ Author information

Abstract

BACKGROUND & AIMS: Non-alcoholic steatohepatitis (NASH) is a multisystem condition, implicating liver and adipose tissue. Whereas the general involvement of the innate and adaptive immune system has been established, we aimed to define the exact role of the functionally diverse T-cell subsets in NASH pathogenesis through diet reversal and immunological modulation.

METHODS: Multiple experimental setups were used in 8-week-old C57BL/6J mice, including prolonged high-fat high-fructose diet (HFHFD) feeding, diet reversal (DR) from HFHFD to control diet, and administration of anti-CD8a and anti-IL-17A antibodies. Plasma ALT, glucose, and lipid levels were determined. Liver and adipose tissue was assessed histologically. Cytotoxic T (Tc), regulatory T (Treg), T helper (Th) 1, and Th17 cells were characterized in liver and visceral adipose tissue (VAT) via flow cytometry and RNA analysis.

RESULTS: HFHFD feeding induced the metabolic syndrome and NASH, which coincided with an increase in hepatic Th17, VAT Tc, and VAT Th17 cells and a decrease in VAT Treg cells. Although DR induced a phenotypical metabolic and hepatic normalization, the observed T-cell disruptions persisted. Treatment with anti-CD8a antibodies lowered Tc cell numbers in all investigated tissues and induced a biochemical and histological attenuation of the HFHFD-induced NASH. Conversely, anti-IL-17A antibodies decreased hepatic inflammation without affecting other features of NASH or the metabolic syndrome.

CONCLUSIONS: HFHFD feeding induces important immune disruptions in multiple hepatic and VAT T-cell subsets, refractory to diet reversal. In particular, VAT Tc cells are critically involved in NASH pathogenesis, linking adipose tissue inflammation to liver disease.

Egyptian knowledge bank

The screenshot shows the Egyptian Knowledge Bank website. The header includes the logo on the left and navigation links in Arabic and English on the right. A search icon is also present. A white modal box in the center-right contains a confirmation message in Arabic, indicating that a new account has been created and a confirmation email has been sent. At the bottom of the modal, there are two green buttons: 'الخطوة التالية' (Next Step) and 'ارسل' (Send), with the latter highlighted by a red rectangle.

نبذه

تعتبر شركة موسوعة بریتانیکا ناشر تعليمي عالمي لمنتجات ترتقي بالمعرفة والتعلم. ستوفر الموارد الرقمية الخاصة ببریتانیکا الأساس الراسخ لخبرات التعلم الحديث للجيل الحالي. وترغب بریتانیکا في تقديم مجموعة من المنتجات المختارة خصيصاً لخدمة احتياجات المتعلمين والمعلمين على النحو الأكمل وذلك في الجامعات والمكتبات والمعاهد البحثية والطبية والمدارس والمستخدمين بالمنزل.

قائمة المنتجات :

○ منهج الصف الأول الثانوي

○ Britannica Academic

تقدم وصول سريع وسهل للمعلومات الشاملة ورفيعة المستوى حيث تجمع موسوعة بریتانیکا الشاملة بالإضافة إلى قاموس ميريام وبستر كوليجييت وقاموس المعاني المترادفة، والمجلات والنشرات الدورية، والمصادر الأولية وغيرها الكثير من أدوات البحث. وتوفر مجموعة متنوعة من المصادر الموثوق بها التي يحتاج الطلاب الرجوع إليها لعمل البحوث الشاملة، وجميعها مكتوبة لتقديم رؤى وأفكار شاملة ومتوازنة. وبالإضافة إلى ذلك، يشتمل المحتوى بالكامل على الاستشهادات المرجعية المطلوبة لتقديم مقالات شديدة الدقة من الناحية الأكاديمية.

○ Britannica school

○ Elementary School

○ Middle School

○ High School

توفر ثلاث مراحل للتعليم: (الأساسي) المرحلة الابتدائية، (المتوسط) المرحلة الإعدادية و(المتقدم) المرحلة الثانوية، وذلك للإستخدام في المدارس والمعلمين من المراحل الابتدائية الى الثانوية وصولاً إلى الدراسة الجامعية. فهي

ELSEVIER

ELSEVIER

➤ Back To Sources

Description

For over 135 years, Elsevier has been helping professionals advance knowledge by expanding the body of information, and enabling it to yield positive, measurable results. Elsevier is an information solutions company with roots in publishing scientific, medical, and technical literature. We continue to produce intellectual content—largely in the form of digitized books, journals, and proprietary databases—via web-based and offline channels. In addition through our platforms, we provide integrated technology and analytics that enable clients and end-users to do 'more with' information: to interact with it, manipulate it, share it, and extract intelligence with greater flexibility, efficiency, and creativity.

ADIS

Description

AdisInsight helps users to stay at the forefront of research by providing the most compelling current evidence on drug treatments being developed worldwide – how well they work, how safe they are, who is working on them, and how soon they will be available.

The user-friendly database provides easy access to expertly-written drug information, with a single search equivalent to searching across thousands of journals, conference proceedings, company websites and other published sources.
