---	--

First Question

Choose the right answer after reading the passage:- (10 degrees)

The flying Doctor

Jon Flynn was born in Australia in 1880. John left the city of Melbourne and went to work in South Australia. They built a number of small hospitals and found nurses to work in them. But at that time there were only two doctors in all of South Australia. One story Flynn often told was of Jimmy Darcy. One day Jimmy had an accident on his farm so friends took him to see F.W. Tuckett, who worked at the post office at Halls Creek. It was a journey of 22 Km. Tuckett was the only person in the area who knew anything about medicine. He tried to help but Jimmy was too ill. Tuckett finally talked by radio to a doctor in Perth, a city 1500 Km away. The doctor took ten days to arrive. He travelled by car, by horse and on foot and when he arrived, he found that Jimmy was already dead.

Flynn saw that planes could really help people in the outback. He wrote about his idea for a ' Flying doctor ' in 1917 but it wasn't until 1928 that one actually took off. By the 1930's there was a Flying Doctor plane in every part of Australia.

1 - What does Flynn tell us about Jimmy?

- a- He lived at Hall Creek
- b- He was a farmer
- c- He was often ill

2 - Why did Jimmy and his friends go to see F.W. Tuckett?

- a- He helped sick people
