Zagazig University College: Faculty of Nursing First Year Exam. Date: 12 / 1 / 2017 First Semester 2016 / 2017	Final Theoretical Exam Subject: English Exam Time: 3 hours Total Score: 30 marks Number of questions: 7 Number of papers: 4 papers
--	---

Answers all the following questions:

COMPREHENION

1) READ THE PASSAGE, AND THEN ANSWER THE QUESTIONS;{5 marks}

Rainforests circle the globe for twenty degrees of latitude on both sides of the equator. In that relatively narrow band of the planet, more than half of all the species of plants and animals in the world make their home. Several hundred different varieties of trees may grow in a single acre, and just one of those trees may be the habitat for more than ten thousand kinds of spiders, ants, and other insects.

Unfortunately, half of the world's rainforests have already been destroyed, and at the current rate, another 25 percent will be lost by the year 2000. Every sixty seconds, one hundred acres of rainforest is being cleared. By the time you finished reading this passage, two hundred acres will be destroyed; when this happens, constant rains erode the former forest floor, and the ecology of the region is altered forever. Thousands of species of plants and animals are condemned to extinction and, since we aren't able to predict the ramifications of this loss to a delicate global ecology, we don't know what we may be doing to the future of the human species as well.

Answer the following questions :

1) What is the point of view that the author expresses in this passage?

.....
.....
.....

2) What is the meaning of the word "just" in the passage?

.....
.....

3) How many of the world's rainforests are projected to be destroyed if the current rate continues?

.....
.....
.....

.....
.....
.....
.....
.....
.....
.....
.....

7) TRANSLATE THE PASSAGE INTO ARABIC. {4 MARKS}

When a patient is sick, the contents of the stomach are ejected through the mouth. The ejected stomach contents are known as vomitus. Vomitus usually consists of partially digested food, but may consist of bile, blood, or a foul-smelling, brown fluid. Vomiting, or emesis, is one of the principal symptoms of disorders of the digestive system.
