برنامج هندسة القوى الميكانيكية  
Faculty of Engineering - Zagazig University  
Mechanical Power Engineering Program

### (Mission)

To prepare distinguished engineers who are able to innovate and meet the requirements of local and international labor markets in the fields of mechanical power engineering through paying attention to the quality of educational process, continuous training, and cooperation with governmental institutions.

### Goals

1. To prepare a trained graduate capable of making decisions, dealing with crises, solving problems, and competing in the labor market.
2. To provide expertise and engineering consultancy in all fields of mechanical power engineering to contribute to the development of society, environment, and industry.
3. To urge students to actively participate in local and international competitions and conferences.
4. To improve academic courses and postgraduate programs in accordance with international standards to suit the needs of the labor market.
5. To activate the continuous evaluation and quality management system to achieve the goals of the program, the college, and the university.
