

كلية الصيدلة – جامعة الزقازيق

FACULTY OF PHARMACY – ZAGAZIG UNIVERSITY

CLINICAL PHARMACY PROGRAM

Features of the clinical pharmacy program

1. The clinical pharmacist is an important member of the medical team and is considered an essential partner in determining drug doses
2. Students study clinical courses such as heart, chest, pediatric, dermatology, oncology, gastrointestinal, etc., which qualifies them to deal professionally and be a member of the medical team.
3. Students are divided into small groups with a maximum of 60 students in each lecture and 30 students in each laboratory.
4. Separate halls are allocated for program students, all of which are air-conditioned and equipped with modern projectors
5. The academic advisors who help the student choose courses, distribute the academic load, and solve their academic and social problems if necessary.
6. Students are supported with various sports and artistic activities and trips, in addition to health care.
7. Students of the program are trained during the internship year in at least 4 courses within Zagazig University Hospitals, which implement clinical pharmacy practice, and one course is allocated for training in the pharmaceutical field.
8. The training program is designed in different clinical specialties, such as (cardiology - cancer - psychiatric and neurological diseases - nutrition - intensive care - drug information unit - pharmacoeconomics - and clinical research) according to the university's capabilities and the needs of the community within the university's scope.
9. Each of the top three students receives free scholarships at the rate of: 50% for the first student and 25% for the second and third students (at least the grade is excellent (GPA 3.7). In the event that more than one student participates in the same order, the scholarship will be divided equally among them.).
10. The graduate of the clinical pharmacy program is a distinguished graduate who is qualified with the latest pharmaceutical and medical concepts that qualify him to compete at the local and regional levels and has the ability to work within the therapeutic medical team. The graduate of the program is also able to work in
