

Zagazig University – College of Education
Program: Preparing chemistry teachers in
English

Zagazig University, Faculty of Education
Preparing a chemistry Teacher by English Language Program

Document of the distinctive Features of the
Chemistry Teacher preparation Program in English

The program is distinguished by a number of features, including:

1- : Modernity and keeping up with developments

chemistry teacher preparation program (the first cycle of basic education) in the English language is distinguished by its modernity due to it being one of the most important specializations that keeps pace with scientific developments, technological innovations, and the information revolution, which local, regional, and international systems agree to adopt due to its importance.

2- : Adequacy and excellence of the program's teaching staff

The program has a sufficient number of faculty members and supporting staff members to teach in the program . The ratio between the numbers of faculty members to students has been calculated at a ratio of (1:14) for the academic year .AD 2021/2020

3- : Efficiency and excellence of the program's teaching staff

There are many forms of excellence among the faculty members conducting the program, as a number of them were chosen as members of the lists of arbitrators and scientific committees to promote professors and assistant professors. In

6- : Study system and academic regulations

The program adopts a list of the credit hour system that is developed in light of developments, studying the labor market, following up on developments in the specialization, and comparing the list with corresponding regulations. The program also uses an academic guidance system to help students register, delete, and add through the college's academic guidance unit, which is reflected in an increase in graduation rates from the program.
