Clinical pediatric Nursing Course

Course Title: clinical obstetric Nursing

Course description

This course provides opportunities to develop competencies necessary to meet the needs of individuals throughout the lifespan in a safe, legal, and ethical manner using the nursing process. Students learn concepts and theories basic to the art and science of nursing. The role of the nurse as a member of the healthcare team is emphasized. Students are introduced to the concepts of client needs, safety, communication, teaching/learning, critical thinking, ethical-legal, cultural diversity, nursing history, and the program's philosophy of nursing. Additionally, this course introduces psychomotor nursing skills needed to assist infant in meeting basic human needs. Skills necessary for maintaining microbial, physical, and psychological safety are introduced along with skills needed in therapeutic interventions. At the conclusion of this course students demonstrate competency in performing basic nursing skills for infant with common health alterations.

Course objectives:

General objectives of clinical guide line

At the end of the course, each student should be able to:

- Perform Antenatal assessment (Take history, physical examination investigation).
- Demonstrate abdominal examination during pregnancy and labor (abdominal grips).
- Monitor fetal heart rate.
- Perform vaginal examination during pregnancy and labor.
- Administer magnesium sulfate.
- Identify stages of labour and nursing care during these stages
- Identify nursing care regarding cesarean section
- Provide perineal care and episiotomy care.
- Provide immediate care to the new born.
- Demonstrate post-partum assessment.
- Demonstrate Neonatal assessment.
- Demonstrate Neonatal resuscitation.
