Adult Nursing II (medical-Surgical Nursing)

course

Course Title: Adult Nursing II (medical-Surgical Nursing)

Course description

This course is designed to orient the junior nursing student to the common medical-Surgical disorders in different body systems as (perioperative care, oncology management, gastrointestinal tract, musculoskeletal system, urology system, endocrine system and management for patient with fluid and electrolyte imbalance). Also this course provides the knowledge, skills and attitude of student nurses regarding professional nursing role and management in different body systems problems to be effective members of the collaborative health care team and enhance patient's outcome. This course has a unique emphasis on effective surgical nursing skills as evidence based nursing practice for safe, competent and skilled nursing procedures.

Course objectives:

Upon completion of this course, the student will be able to:

1. Enhance learning by active participation in teaching-learning process.
2. Identify common perioperative care
3. Identify common oncological disorders and develop nursing professional role in management.

4. Distinguish between common urological disorders and nursing professional management.
5. Discuss common gastrointestinal disorders and nursing care plan.
6. Determine the level of fluid and electrolyte imbalance and acquire knowledge, positive attitudes, and skills in fluid and electrolyte imbalance management
7. Describe endocrine disorders and its management
8. Differentiate between the disorders surgeries and provide appropriate nursing management
9. Highlight urology disorders and professional nursing role
