

Teaching Plan of Evidence-Based Nursing Practice 3rd Level 5th Semester 2026-2027

Evidence-Based Nursing Practice Course

Course Title: Evidence-Based Nursing Practice

Course description:

Evidence-Based Nursing Practice course introduces nursing students to the principles of integrating current research, clinical expertise, and patient values into nursing care. It trains students on how to formulate clinical questions, search for and critically appraise evidence, and apply research findings to support safe, effective, and patient-centered decision-making in diverse healthcare settings.

Course policies:

- Students must prepare for lectures by reading the assigned materials.
- Attendance is mandatory. Students who miss more than three lecture without an approved excuse will be dismissed from the course.
- Students unable to attend an exam must follow university regulations; otherwise, they will receive a zero.
- Students must complete assignments on time and maintain professional behavior.

Learning Resources

1. Evidence-Based Nursing Practice Textbooks
2. Reliable Online Resources
3. Lecturer's Notes and Course Materials
4. Clinical Guidelines and Professional Standards
5. Educational Videos and Digital Learning Materials

Teaching and Learning Methods

1- Theoretical Learning

- Theoretical Lectures
- Self-Directed Learning
- Literature and Desk Research
- Data Show Presentations

2- Practical and Interactive Learning

- Demonstrations
- Role-Playing Activities
- Case Studies
- Student Presentations

3- Collaborative Learning

- Group Discussions
- Brainstorming Activities
- Group Activities

Theoretical Lectures of Evidence-Based Nursing Practice:

List of Contents:

1. Introduction and definition of Evidence-Based Nursing Practice
2. Steps of Evidence-Based Nursing Practice
3. Level of Evidence-Based Nursing Practice
4. Sources of Evidence-Based Nursing Practice
5. Models of Evidence-Based Nursing Practice
6. Barriers and Facilitators to evidence implementation
7. Searching for evidence electronic data base
8. Critical appraisal of evidence
9. Formulating clinical questions using PECO process
